Hyper MX

6400 W

Power under control

With a 3500 W motor and a peak power of 6400 W, it delivers stable and efficient power, reaching up to 75 km/h – a performance superior to the segment standard.

RANGE

Up to 75 km on a single charge

Its 72 V 35 Ah (2520 Wh) battery allows you to travel between 70 and 75 km per charge, giving you the freedom to navigate the city and continue when the road turns unpaved. An efficient and reliable solution for everyday use, with the peace of mind of reaching your destination without constantly worrying about recharging.

MID-MOUNTED MOTOR

The motor at its heart

Its mid-engine configuration and low centre of gravity enable agile and dynamic handling, perfect for urban commuting and mixed routes.

STATE-OF-THE-ART TECHNOLOGY

A connected experience

Featuring an LCD display, full LED lighting, card-based ignition, the Hyper MX allows you to check key vehicle data and stay informed at all times. Greater visibility, more control, and a more connected riding experience on every journey.

SUSPENSION

Bump-proof

More comfort, more control, and less impact. The front fork, along with the central rear shock absorber, cushion road irregularities, ensuring the motorcycle remains stable and precise, even on bumpy or challenging paths.

17" ON-ROAD WHEELS

Connected to the asphalt

Equipped with 17" front and rear wheels and on-road tyres, it guarantees stable and efficient performance on asphalt, optimising grip, cornering precision, and comfort in urban use.

Hyper MX electric motorcycle

Urban electric motorcycle with maximum power of 6400 W and range of up to 75 km. Equipped with central motor for balanced power delivery and removable battery for easy charging. Homologated as L3e, suitable for A1 or B license with over 3 years' experience. Features all-terrain tyres that enhance versatility in urban use.

FEATURES:

Balanced power and total control: With a 3500 W mid-drive motor and a maximum power output of 6400 W, this motorbike delivers stable and efficient power. Perfect for city commuting and mixed-terrain riding, it offers a dynamic ride with optimised traction thanks to its mid-motor configuration.

The perfect range for your daily commute: Its 72 V 35 Ah (2520 Wh) battery allows it to travel up to 75 km on a single charge*, providing the range needed to get around freely both in town and on unpaved roads. An efficient and reliable choice for everyday use.

Stability and traction on any surface: Fitted with 17-inch front and rear wheels and mixed-use tyres, this motorbike guarantees optimum traction on both roads and rough terrain. The disc brake system on both wheels, featuring CBS, ensures stable and safe braking at all times.

Top speed of up to 75 km/h, delivering performance that exceeds the segment standard.

Disclaimer: *Maximum figures based on internal testing under ideal conditions with a 75 kg rider, at 60 km/h. and in ECO mode. Actual performance may vary depending on driving style, terrain, temperature and load.

Removable battery for convenient recharging: The removable battery allows you to charge it easily at home, at work or at any power point, offering complete convenience and flexibility.

Designed for individual use: With a single seat and a maximum load capacity of up to 100 kg, this motorbike is designed for riders seeking a personalised and direct riding experience. Ideal for urban and suburban routes.

Suspension optimised to cushion bumps: Its front fork suspension and central rear shock absorber ensure comfort and control, even on rough or bumpy roads. Drive smoothly and confidently, whatever the conditions.

Urban design with an adventurous spirit: The Hyper MX's city-cross style combines modern lines with a robust build, making it perfect for those looking for a versatile motorbike that can adapt to both city riding and mixed terrain without compromising on style.

Clean and safe riding: As a fully electric L3e vehicle, it complies with all current regulations and is eligible for the "ZERO EMISSIONS" environmental badge, allowing unrestricted access to urban areas and enabling sustainable travel.

It also features cruise control, energy recovery, Hill Start Assist and Hill Descent Control for a more comfortable and safer driving experience.

Advanced technology for a superior experience: Equipped with an LCD display, full LED lighting, Bluetooth connectivity and a mobile app, the Hyper MX allows the rider to monitor key vehicle data and enjoy a more comprehensive digital experience on every journey.
