Light up the city

12,000 W POWER

Powered by watts

Up to 115 km/h to set off decisively, overtake with confidence and move with agility both in the city and on the open road.

UP TO 125 KM OF RANGE¹

Several laps around the city

Extend your journeys, reduce your stops. Its 72 V, 35 Ah battery provides the power you need to move with greater freedom every day.

ABS AND TCS

Stay in control in every situation

ABS helps you maintain control during heavy braking, while TCS optimises traction on slippery surfaces. Greater safety and confidence on every journey.

MID-MOUNTED MOTOR

Agility right from the centre

The mid-mounted motor balances weight distribution and lowers the centre of gravity to deliver a more stable, dynamic and agile riding experience on every journey.

REMOVABLE BATTERIES

Charge it anywhere

Remove the batteries and charge them conveniently anywhere using a standard household socket. Greater flexibility so that the power is always with you.

CONNECTIVITY

State-of-the-art technology

Connect your smartphone to the 5" TFT display, monitor tyre pressure and enjoy features such as Hill Hold and Hill Descent Control. Full LED lighting and an SOS button for safer riding.

Electric motorbike Nøva Yellow

Urban electric motorcycle with maximum power of 12,500 W and range of up to 78 km. Equipped with central motor for balanced power delivery and removable batteries for easy charging. Homologated as L3e, suitable for A1 or B license with over 3 years' experience. Cutting-edge design and maximum safety with ABS and TCS brakes, enhanced by a premium 5-inch smart display linked to your smartphone.

FEATURES:

Balanced power and instant response: With a powerful 6000 W central motor and a maximum power output of 12500 W, the Nøva delivers powerful acceleration, allowing you to overtake with confidence and manoeuvre with agility on all types of roads. The central motor ensures constant torque delivery, ideal for effortlessly leaving traffic behind, whilst its positioning provides superior stability and optimised traction on every bend.

Extended range for any destination: Say goodbye to constant charging with its dual removable 72 V 35 Ah (5040 Wh) battery pack, which allows you to travel up to 125 km on a single charge. A robust and efficient solution, ideal for those seeking total mobility in both urban environments and on inter-city journeys.

Complete confidence on every journey: Ride with total safety and control thanks to its ABS brakes, traction control system (TCS) and the exceptional agility provided by its 14" wheels. A combination of technology and grip designed to deliver flawless responsiveness and total stability on any surface and type of road.

Top speed of 115 km/h, ideal for confident overtaking and mastering traffic with quick acceleration.

Removable batteries for convenient recharging: The removable batteries allow for easy charging at home, at work or at any power point, offering complete convenience and flexibility.

Unprecedented premium features: Full connectivity via Screen Mirroring on a 5" TFT display, tyre pressure monitoring for added safety, and complete control thanks to advanced assistance systems such as Hill Hold Control and Hill Descent Control. Rounded off by full LED lighting and an SOS button, it combines cutting-edge technology and advanced assistance in a single vehicle.

Unlimited space and comfort for two: Designed with an extra-large flat seat in a modern style, this bike guarantees maximum comfort and exceptional robustness with a maximum load of 308 kg. The ideal choice for sharing journeys with total freedom, style and reliability

Maximum comfort: Its advanced hydraulic suspension and dual rear shock absorber system ensure superior absorption of road irregularities. Enjoy a smooth, stable and controlled ride, even on the most demanding or potholed roads.

COMPOSITION:

Product, instructions manual, charger, set of keys and cards
