All-terrain robots

Stairs⁴

Surface¹

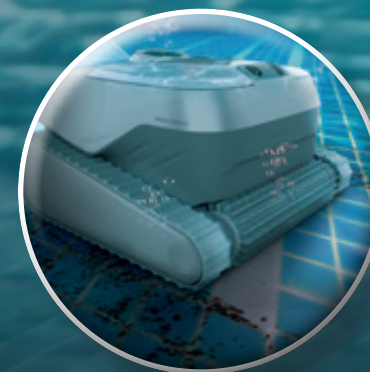

Waterline²

Walls²

Bottom⁴

Customised navigation

POOLDROID VISION¹

Adaptive cleaning

The robot's built-in camera allows it to analyse its surroundings and recognise dirt for more precise cleaning, adapting its movements and suction power. Also, it detects obstacles such as drains or toys and adjusts its cleaning route accordingly.

POOLDROID RADAR²

Intelligent navigation

It analyses the pool using a combination of ultrasonic and laser sensors, generating a cleaning pattern that optimises the robot's navigation and allows it to clean from the areas where dirt accumulates most, such as the bottom, to the easiest ones.

APP CONTROL

STEPSENSE¹

Cleaning takes it to the next level: now it tackles steps.

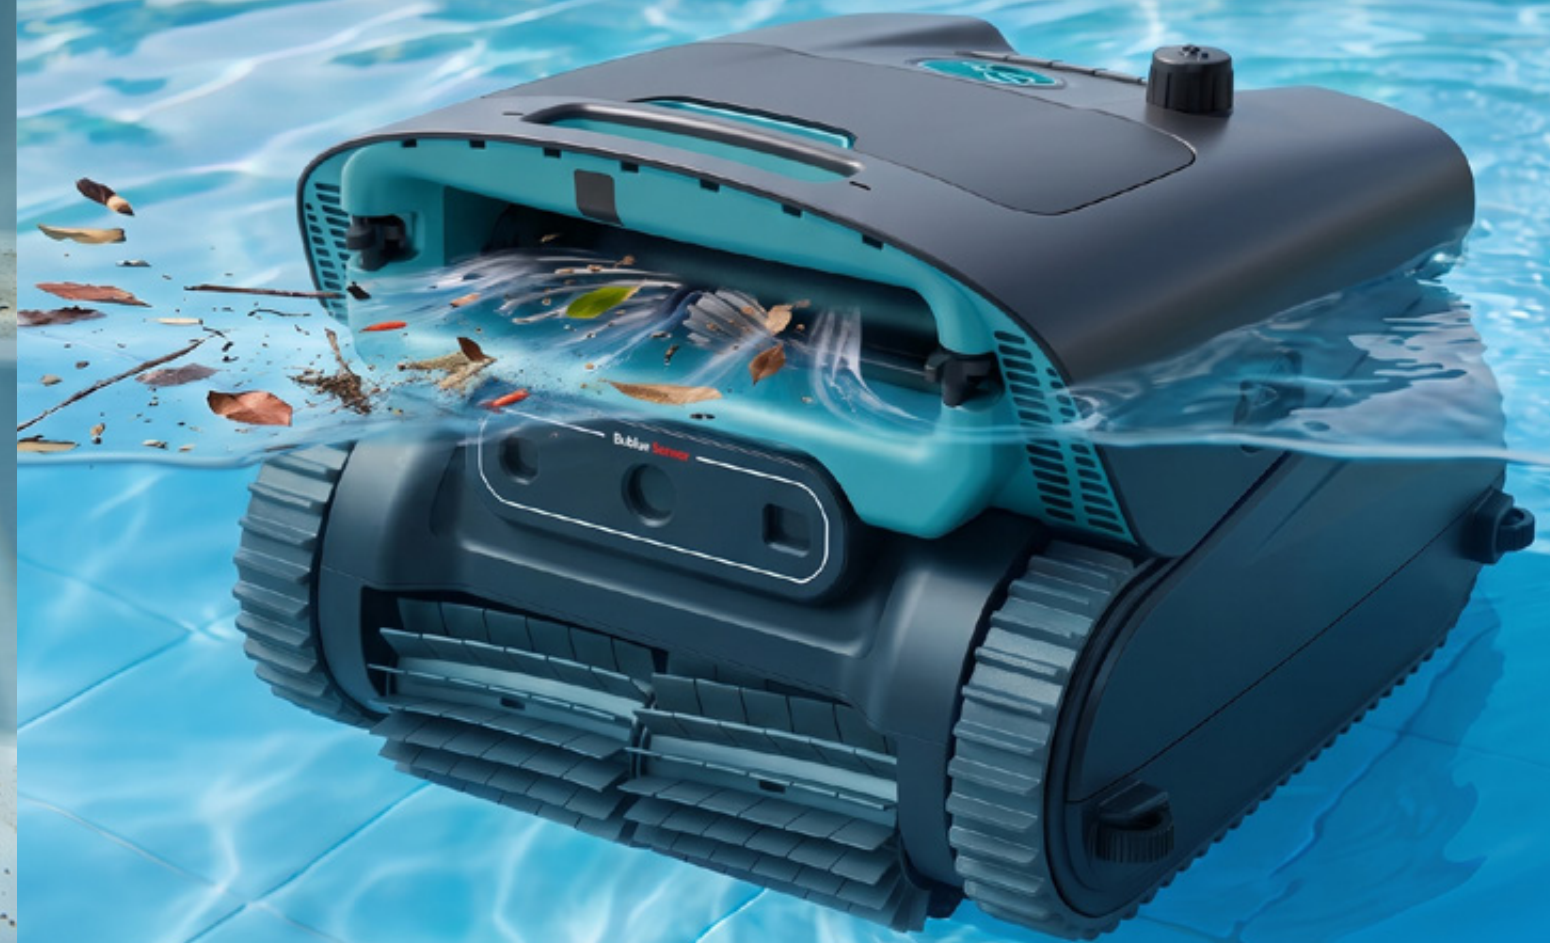

It climbs the steps one by one and, thanks to its compact design, cleans the entire surface of each step. A thorough cleaning that tackles every corner where dirt tends to linger, without limitations, for a spotless pool.

TOTAL SURFACE²

Spotless surface, total cleanliness.

Detects and captures surface debris, from the lightest particles to floating leaves, adapting its suction power to every challenge. Prevents debris from building up so you can enjoy clean, clear and spotless water.

Effortless vacuuming and scraping

SUCTION POWER

Extreme power

It effortlessly sweeps away dirt thanks to suction of up to 30,000 L/h (8,000 gal/h), a superpower that captures all types of debris, from leaves to the finest dust particles.

DOUBLE ROLLER

Scrapes away dirt without effort

Removes even the most stubborn dirt from floors and walls with its double roller brush, which reaches even the most difficult areas.

LATERAL SCRUBBING

Cleans the waterline

The robot detects the waterline and moves back and forth to remove accumulated dirt, leaving the area spotless.

Unstoppable cleaning

LONG RUNTIME

Covers up to 600 m²

Complete cleaning in one go thanks to its 8,000 mAh (max.) battery, which offers up to 4 hours of runtime and allows it to cover areas of up to 600 m².

ALLSURFACE

Suitable for all types of pools

Chlorinated water? Salt water? It doesn't matter; the robot can be submerged in either and leave the pool floor spotless, regardless of the type of surface or the shape of the pool.

AUTOPARKING

Take it out effortlessly

The robot features an auto-parking system to approach the pool edge once it has finished cleaning, and a hook, making it even easier to remove.

EASYCLEAN

Always like new

Get rid of all vacuumed dirt effortlessly: lift the lid, empty the tank, and you're done! The robot will be ready to resume cleaning whenever you need it.

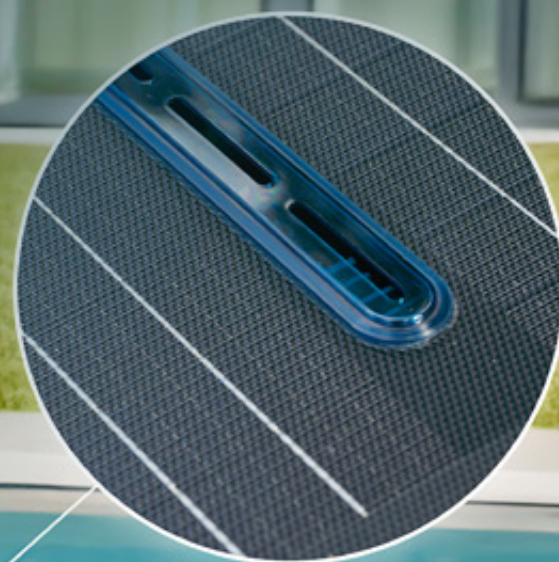

Specialists in keeping the surface in tip-top condition.

SOLAR CHARGING¹

As tireless as the sun.

A new day dawns, a new cleaning cycle begins. Thanks to its built-in solar panel, it recharges while working and harnesses solar energy to maintain continuous cleaning. No breaks – just a spotless surface all day long.

VORTEX²

The surface enters its orbit.

Its vortex creates a high-suction current on the surface that draws the water inwards, precisely sweeping up and capturing all floating debris. Nothing escapes: leaves, insects and debris are trapped before they sink, keeping the surface consistently clean and the water crystal-clear.

ROCKSTAR POOLDROID 3000

Cleans your pool thoroughly

Rockstar brings the most powerful cleaning to your pool. With its All Surface system, it adapts to above-ground or in-ground pools, with chlorinated or salt water, and to all types of pool surfaces and finishes. Effectively cleans hard-to-reach areas such as steps, corners, pool edges and spas, with no effort thanks to its ergonomic design.

ADJUSTABLE 6-SECTION HOSE

180 µM FILTER

Conga Pooldroid 3000 FloorMaster

Conga Pooldroid 3000 FloorMaster wireless robot pool cleaner for flat pools Suitable for surfaces up to 80 m2 and a maximum depth of 2.5 metres. 100 minutes of runtime. High-efficiency 100 µm filter. 2.5 L capacity.

FEATURES:

Clean the bottom of the pool with a single click. Autonomous robot pool cleaner that removes dirt efficiently while you enjoy your time at the pool.
Suction of up to 100 L/min. Dual motor for maximum performance, allowing the robot to clean the entire pool effortlessly and thoroughly.
Deep cordless cleaning. Forget about tangled cables and hoses and enjoy your pool, even while the robot is running.
Cleans the entire surface non-stop. Up to 100 minutes of runtime.
High-efficiency filtration. 100 µm filter and 2.5 L capacity.
Suitable for pools up to 80 m² and a maximum depth of 2.5 metres.
Returns to the wall when it runs out of battery. Autoparking system which makes it easy to take the robot out of the pool. It also includes a hook for added convenience.
Compatible with chlorine pools, saltwater pools and all types of floors. All Surface technology. Removable and easy-to-clean structure. EasyClean system to easily disassemble the robot, clean its interior and leave it ready for the next use.
Compact design, lightweight and easy to store.

Conga Pooldroid AquaSkater

Conga Pooldroid AquaSkater Surface robot pool cleaner.

FEATURES:

Clean the waterline with a click. Cordless robot pool cleaner that removes dirt floating on the surface, even while you're swimming.
Removes all floating debris. Pool Surface: traps leaves, insects and dust from the waterline.
Solar charging with 16-hour runtime. Solar Power: Conga Pooldroid promotes eco-friendly cleaning thanks to its solar charging panel, which enables continuous use while charging with sunlight.
Compatible with type C cable. Ideal for those who want to have their robot always ready, regardless of the weather.
4.5 L basket and a 187.5 µm filter. XXL tank to catch even the most invisible particles.
Clean the entire surface. Ultrasonic sensor navigation to facilitate the cleaning route and complete the entire surface coverage.
Forget about cables and hoses inside the pool. Wireless design.
Suitable for large or small, chlorine or salt water pools.
Returns to the wall when it runs out of battery. Autoparking system which makes it easy to take the robot out of the pool.
Removable and easy-to-clean structure. EasyClean System.

Conga Pooldroid 5000 TotalClean Pearl

Conga Pooldroid 5000 TotalClean Pearl robot pool cleaner for floors, walls and waterline. Suitable for surfaces of up to 100 m2 and maximum slope of 90°. ScubaDriving Tech, orderly cleaning. 120 minutes of runtime. High efficiency 180 µm filter. 4 L capacity.

FEATURES:

Cleans the pool bottom, walls and waterline. All-round robot pool cleaner which allows you to clean the entire pool surface, from the waterline to the bottom, all with a single click.
Sweeps away all dirt. Ultra-powerful 150 L/min suction, power that allows deep pool cleaning.
Orderly navigation. ScubaDriving Tech: it allows the robot to navigate in an orderly manner to efficiently complete cleaning of the entire surface.
Scrapes away effortlessly. Cleaning roller: removes the most stubborn dirt from floors and walls, even in hard-to-clean areas.
Deep cordless cleaning. Forget about tangled cables and hoses and enjoy your pool, even while the robot is running.
Cleans the entire surface without interruptions. Up to 120 minutes of runtime: allows you to clean medium-sized pools on a single charge.
High-efficiency filtration. 180 µm filter and 4 L capacity.
It covers up to 100 m2 and 2.5 m deep. Suitable for small and medium-sized pools.
Moves closer to the wall if the battery runs out. Autoparking system: makes it easy to take the robot out of the pool. It also includes a hook for added convenience.
Suitable for chlorine pools, salt water pools and all types of floors. All Surface: effectively cleans all types of pools.
Removable and easy-to-clean structure. EasyClean system: allows you to easily disassemble the robot, clean its interior and leave it ready for the next use.

Conga Pooldroid 10000

TotalClean AquaSkater

Conga Pooldroid 10000 TotalClean AquaSkater robot pool cleaner for floor, walls, waterline and surface. Suitable for areas up to 300 m². ScubaDriving Tech, orderly cleaning. 150-minute runtime. High-efficiency 180 µm filter. 4 L capacity. Surface cleaning buoy. APP control and remote control. 4 motors.

FEATURES:

Cleans the pool bottom, walls, waterline and surface. All-round robot pool cleaner that enables whole-pool cleaning with just one click.

Sweeps away all dirt. Ultra-powerful 230 L/min suction, power that allows deep pool cleaning. Orderly navigation. ScubaDriving Tech: it allows the robot to navigate in an orderly manner to efficiently complete cleaning of the entire surface.

Scrapes away effortlessly. Dual rotating roller: removes the most embedded dirt from floors and walls, even in hard-to-clean areas.

Removes surface dirt. Cleaning float: collects surface dirt, eliminating the need for brooms or other cleaning tools.

Deep cordless cleaning. Forget about tangled cables and hoses and enjoy your pool, even while the robot is running.

Customised cleaning. APP and remote control: set the cleaning mode and control the robot from anywhere.

Clean your entire pool without stops. Up to 150 minutes of runtime thanks to its 10400 mAh battery. Complete large pool cleaning on a single charge.

High-efficiency filtration. 180 µm filter and 4 L capacity.

Climbs and approaches the wall if the battery runs out. Autoparking System 2.0: facilitates robot removal from the pool. It also includes a hook for added convenience.

Covers up to 300 m² and supports up to 3 metres depth. Suitable for small, medium and large-sized pools.

Horizontal wall cleaning at waterline height. Lateral Scrubbing.

Suitable for chlorine pools, salt water pools and all types of floors. All Surface: effectively cleans all types of pools.

Removable and easy-to-clean structure. EasyClean system: allows you to easily disassemble the robot, clean its interior and leave it ready for the next use.

Conga Pooldroid 20000

TotalClean Vision

Conga Pooldroid 20000 TotalClean Vision. Robot pool cleaner for floors, walls and waterline. Vision Technology, with Artificial Intelligence and camera. 30,000 L/h suction. Twin roller. Up to 4h of runtime in Deep mode. APP.

FEATURES:

Cleans the pool bottom, walls and waterline. All-terrain robot that achieves complete pool cleaning, eliminating dirt and stains from the bottom, walls and waterline. Total cleaning, fast and efficient.

Analyses the environment, recognises dirt and avoids obstacles. Pooldroid Vision: camera navigation system that enables the robot to detect the type of dirt, increasing suction in areas with more debris. Additionally, it detects obstacles such as drains or toys to adapt the cleaning route.

Maps, creates an efficient route and adapts cleaning in real time. Pooldroid Radar: combines ultrasonic sensors with a laser sensor, enabling the robot to map the surface and adapt its movements in real time when it identifies dirt or complex areas where it intensifies cleaning. Organised route, total coverage. N-pattern navigation that enables the robot to cover 100% of the surface efficiently and quickly.

Extreme power for thorough cleaning. Ultra-powerful 30,000 L/h (8,000 Gal/h) suction: power to clean all types of dirt without effort.

Vacuums and retains even microscopic dirt. Double-layer filter (180 µm and 80 µm): prevents vacuumed dirt from returning to water, even microscopic particles, thus improving water clarity.

Effortless stain removal. Dual rotating roller: removes the most embedded dirt from floors and walls, even in hard-to-clean areas.

Covers up to 600 m² without interruptions. 8000 mAh battery with 4 hours of runtime: enables completion of large pool cleaning with a single charge.

Adapts to any pool shape, floor type and water. All Surface: total versatility so you forget about worries. Pooldroid adapts to all shape types and cleans fibreglass, vinyl, ceramic, concrete and stone floors.

Suitable for chlorinated, salt water and up to 3 metres depth. Pooldroid cleans all types of pools regardless of the type of water, submerging up to 3 metres.

COMPOSITION:

Robot, charger, hook, instruction manual

	
	
	220-240 ~ V 50/60 Hz W

Conga Pooldroid 6000 TotalClean

Conga Pooldroid 6000 TotalClean pool-cleaning robot. Cleans the floor, walls, steps and waterline. 19,700 L/h suction. StepSense, cleans steps.

FEATURES:

Total coverage. An all-terrain pool-cleaning robot that cleans the floor, walls, steps and waterline quickly and efficiently.
Wipes out dirt. Ultra-powerful suction of 19,700 L/h (5,200 GPH), power that allows for deep cleaning of the pool.
StepSense. Climbs the steps one at a time and, thanks to its compact design, cleans the entire surface of each step. A complete clean that tackles every corner where dirt tends to build up, with no limitations, for a spotless pool.
Cleans your entire pool without stopping. Up to 2 hours of battery life. Allows large pools to be cleaned in a single charge.
180 µm filter with a 2.5 L capacity.
Orderly navigation. Conga Pooldroid moves in an N-shaped pattern, creating the most efficient route with every clean.

Conga Pooldroid AquaSkater Vortex

Conga Pooldroid 6000 TotalClean pool-cleaning robot. Cleans the floor, walls, surface and waterline. 7,600 L/h suction. Pooldroid Vision & Radar.

FEATURES:

Total coverage. An all-terrain pool-cleaning robot that cleans the floor, walls, steps and waterline quickly and efficiently.
Cleans the surface. Forget about cleaning the dirt floating on the surface — Conga Pooldroid does it for you.
Wipes out dirt. Ultra-powerful suction of 7,600 L/h (2,000 GPH), power that allows for deep cleaning of the pool.
Pooldroid Vision. Its camera-based navigation system detects leaves, dust and other debris, increasing suction in areas with more residue. It also detects obstacles and adapts its route accordingly.
Pooldroid Radar. By combining ultrasonic sensors with a laser sensor, Conga Pooldroid generates real-time zoning and movement algorithms, identifies the most complex areas and adapts to create the most efficient route, ensuring 100% coverage. Conga Pooldroid also moves in an N-shaped pattern, creating the most efficient route with every clean.
Cleans your entire pool without stopping. Up to 2 hours of battery life. Allows large pools to be cleaned in a single charge.
35 PPI filter with a 5 L capacity.
