**CREMMAET™ SUPER-AUTOMATIC
COFFEE MACHINES**

2026

Real coffee, pure simplicity

Experience the pure taste of freshly ground coffee at the touch of a button. The most advanced technologies respect the essence of traditional coffee-making while enhancing it, allowing you to enjoy authentic coffee without complications. With the latest models in the range, for the first time you can choose between two varieties of bean in a single machine, or opt for an ultra-compact design to bring all the flavour of freshly ground coffee to any kitchen.

CREMMAET™ DUELIA

Choose between two types of coffee beans at the touch of a button

Enjoy two varieties of coffee beans – such as regular and decaffeinated – in the same super-automatic machine, at the touch of a button: no need to change hoppers or activate any mechanisms. Select with a single touch and the DualBean technology will grind only the selected variety. Also, its anti-mixing system grinds each type of bean independently and prevents them from mixing, thus preserving their full flavour.

DUALBEAN

Two types of bean always ready. Switch between Hopper 1 and Hopper 2 to choose instantly.

ANTI-MIXING SYSTEM

Weighs and grinds each type of bean separately to preserve the purity of each bean.

MILK TANK

Prepare cappuccinos and lattes with perfect foam at the touch of a button.

CREMMAET™ STRETTA & CREMMAET™ CUBE STRETTA

Plenty of coffee in very little space

The unmistakable aroma and flavour of freshly ground coffee, the convenience of a super-automatic machine and a design that fits perfectly into your kitchen. The Cremmaet Stretta and Cremmaet Cube Stretta ranges are designed for those who want to enjoy exceptional coffee without compromising on worktop space. Additionally, the Steam models feature a steam wand for frothing milk just like a barista.

CREMMAET™ DOPPIA

More body, more flavour, more coffee.

While other super-automatic machines typically process an average of 13 g, Cremamet™ Doppia uses up to 18 g of coffee per cup, delivering more intense, aromatic espressos brimming with nuanced flavours. The result: café-quality taste, all from the comfort of your home.

Lungo

vs otros

18 G

The only one with 18 g of coffee¹.

MILK TANK OR STEAM WAND

Prepare cappuccinos and lattes with perfect foam at the touch of a button.

TOUCH DISPLAY

Choose from up to 7 recipes with modern, intuitive control.

Better from bean to cup

Elevate your ritual to the next level

Discover the authentic coffee taste and indulge in an unparalleled sensory experience. Fill every cup with a richness of nuances that only freshly ground coffee can offer. Cremmaet™ super-automatic machines grind beans directly and allow you to adjust the grinding level to enhance the qualities of each variety, bean type and recipe.

Adjustable grinding

Achieve uniform and precise grinding for each coffee bean variety thanks to its stainless steel conical burrs and 5 adjustment levels.

Coffee bean container

Preserve the properties of each bean and keep it as fresh as the first day.

STEAM WAND

Create barista-quality milk foam

Control the foam, make a difference

Its professional steam wand allows you to create milk-based coffees and cappuccinos with perfect foam texture, rivalling the finest specialty coffee shops. Elevate your at-home coffee experience and feel like a true barista.

MILK TANK

Delicious Cappuccinos with one click

With its built-in milk container and preset recipes, making cappuccinos and lattes is as simple as pressing a button. Enjoy a fine, smooth and creamy foam prepared at the perfect temperature. Suitable for both animal and plant milk.

Technologies for an unbeatable coffee experience

19 BARS

Unique crema and aroma

The coffee machines feature a pump with up to 19 bars of pressure that extracts every nuance from each bean, achieving unique aroma and crema.

THERMOBLOCK

Coffee ready in seconds

Thanks to its Thermoblock rapid heating technology, you can quickly brew coffee at the perfect temperature.

COLD BREW

Cold coffees

Its cold brew function allows you to prepare cold extraction coffees while preserving the qualities of each bean. Dare to explore beyond the classic Frappé.

PRE-SET RECIPES

Hassle-free coffee

Thanks to its preset recipes, your perfect coffee is just one touch away.

GRINDER

Freshly ground coffee, second to none

Select your favourite bean and savour all the nuances of freshly ground coffee thanks to the airtight coffee container with built-in grinder, which features up to 9 grinding levels to achieve a tailored texture for each coffee bean variety.

FAVOURITE

Your favourite coffee one click away

Save your favourite coffees: choose your profile and store your preferred recipes with your personal touches for quick preparation.

CUSTOM COFFEE

Full personalisation

Choose the beverage and customise it to your taste by controlling the grinding level, coffee intensity, temperature and amount of foam.

Superautomatic Coffee Machines

Discover the Cremmaet™ range

Cremmaet Duelia

Super-automatic coffee machine with dual automatic hopper for switching between beans without mixing them. Dosing system. 19 bar, Thermoblock and conical grinder with 5 settings. 1.1 L water tank, 400 ml milk tank.

FEATURES:

Automatic dual hopper, two coffees always ready. Switch between Hopper 1 and Hopper 2 to instantly choose the bean you fancy. DualBean technology, ideal for alternating between caffeinated and decaffeinated coffee without emptying hoppers or handling beans. Anti-mixing system: always enjoy the coffee of your choice. The hopper rotates to fill a separate dosing compartment and returns to its starting position. The grinder then grinds only the dose contained in that compartment, minimising mixing with the previous coffee. Your personal barista at home. Recipe book with 12 drinks: prepare all types of coffee with one click. Navigate through its TFT screen, choose the ideal coffee quickly and intuitively. Two flavours, two types of coffee bean. Select the bean of your choice on the display and it will automatically use Hopper 1 or Hopper 2 associated with the selected bean. Freshly ground decaf, any time. Switch from an intense espresso in the morning to a decaf in the afternoon without compromising on flavour. Perfect for households where everyone has a different taste, or for adjusting coffee intake throughout the day. Bean blend function to personalise your profile. Set the percentage for each hopper and create bespoke combinations to fine-tune the aroma and body. A practical way to experiment with origins and styles, hassle-free. *The blending takes place in the cup, not during the grinding process, as the machine grinds each coffee separately. Conical grinder with 5 grind settings. The 19 bar pressure helps extract intensity and aromas with a more defined crema. Thermoblock: fast and stable heating. 400 ml milk tank. When you use the maximum 12 g dose, the grinder cleans itself automatically, without any reminders or extra steps. If you use less, the machine will alert you that cleaning is required. 1.1 l water tank. A practical capacity for everyday use, with fewer refills and more continuity. Great for several cups in a row or for households with frequent demand. 95 g bean capacity and a dual-hopper system with a total capacity of up to 190 g. Fewer refills and greater convenience without compromising on freshness. Adjust the height for espresso cups, mugs or taller glasses. A tidier worktop and a more refined presentation. Designed to explore flavours. Two hoppers, grind settings and recipe customisation: a machine designed for trying out different bean origins and profiles. Real control for those who appreciate a well-made coffee.

Cremmaet Cube Stretta Black

Super-automatic coffee machine with a 19-bar pump, 1500 W power output and a built-in grinder. Makes Espresso, Americano, Lungo and Double Espresso at the touch of a button. Compact design with an LED touchscreen, automatic cleaning and easy maintenance.

FEATURES:

Professional extraction with a 19-bar Italian pump. Fitted with a 19-bar ARS Italian pump to ensure precise and consistent extraction. Enjoy a full-bodied coffee with a rich crema and a balanced flavour from the very first cup. 1,500 W power for optimum performance. Its powerful system, delivering up to 1,500 W, and its Thermoblock ensure rapid heating and efficient preparation every time. Freshly ground coffee with every brew. Its 150 g bean hopper allows you to enjoy the full aroma and freshness of freshly ground coffee, bringing out every nuance and flavour. Intuitive LED touchscreen. The touchscreen control system with LED display makes it easy to select drinks and adjust settings, providing a convenient and modern user experience. Speciality coffees at the touch of a button. Make Espresso, Americano, Lungo or hot water quickly and intuitively. It also features a double espresso function for making two coffees at the same time. Fully customisable coffee. Adjust the coffee quantity between 7 and 12 g and select a drink volume of 20 to 250 ml to tailor each brew to your preferences. Large-capacity water tank. The 1.1-litre water tank allows you to prepare several drinks in a row without having to refill it constantly. A super-compact and functional design. It combines grinding, brewing and automatic maintenance systems in a single unit, offering a complete coffee experience while taking up minimal space. Smart automatic cleaning. It features automatic cleaning, rinsing and descaling programmes that help keep the machine in perfect condition with minimal effort. Smart operating indicators. Displays operating information, notifications and alerts for easier control and a more convenient user experience. Adjustable spout for different cup sizes. The adjustable coffee spout easily adapts to different cup heights, from espresso cups to taller mugs. Efficient waste management. It features a drawer for up to 8 cups of coffee grounds and a 600 ml waste water tank, reducing the frequency of emptying. Patented removable brewing unit. Its detachable brewing module facilitates maintenance and guarantees consistent performance for optimum results every time.

A01_EU01_137972

Cremmaet Cube Stretta Grey

Super-automatic coffee machine with built-in grinder. 19 bar. 1300 W. LED indicators.

FEATURES:

Ultra-compact super-automatic coffee machine. 16.5 cm wide. Designed to fit on small worktops without compromising on the full coffee experience. Ideal for modern kitchens where space and aesthetics matter.

Premium extraction at 19 bar. The 19 bar pressure ensures a more consistent coffee extraction, with better aroma development and a more consistent crema. An espresso with more uniform results in everyday use.

Power 1300–1500 W: fast and consistent performance. Its power range allows working with ease during daily use. Less waiting time between coffees and smoother operation when making several cups in a row.

Precise temperature control from the very first cup. Thermoblock technology designed to achieve the correct temperature from the very first coffee, without having to ‘wait for it to settle’.

Built-in grinder for freshly ground coffee. From bean to cup in a single machine to preserve freshness and aroma. A more premium experience without additional accessories on the worktop.

Metal blades: consistent grind. The grinder with metal blades helps achieve a more uniform grind. This improves the consistency of extraction and makes it easier to replicate the result cup after cup.

Touch button and LED display: clear and intuitive control. Touch-sensitive buttons with an LED display for quick and intuitive control of functions. Direct, modern and easy-to-understand operation right from the first use.

Adjust the coffee volume (ml) to suit your preferences.

Set the amount of coffee extracted in millilitres to suit your cup and your recipe. From shorter coffees to longer brews, with greater customisation.

1.1-litre water tank: practical runtime. With a 1.1-litre capacity, it offers the ideal balance between compact size and convenience. Fewer refills and greater continuity in your routine.

Removable brewing unit.

The removable unit allows access to the interior for a more thorough clean. Better hygiene in everyday use and easier maintenance to ensure long-lasting performance.

Design tailored to real-world use.

Compact on the outside and functional on the inside: pressure, power, control and easy maintenance. A more convenient experience, without unnecessary complications.

Cremmaet Cube Stretta Steam Black

Super-automatic coffee machine with a 19-bar pump, 1500 W power output and a built-in grinder. Makes Espresso, Americano, Lungo and Double Espresso at the touch of a button, and features a milk frother for cappuccinos and lattes. Compact design with an LED touchscreen, automatic cleaning and easy maintenance.

FEATURES:

Professional extraction with a 19-bar Italian pump. Fitted with a 19-bar ARS Italian pump to ensure precise and consistent extraction. Enjoy a full-bodied coffee with a rich crema and a balanced flavour from the very first cup.

1,500 W power for optimum performance. Its powerful system, delivering up to 1,500 W, and its Thermoblock ensure rapid heating and efficient preparation every time.

Freshly ground coffee with every brew. Its 150 g bean hopper allows you to enjoy the full aroma and freshness of freshly ground coffee, bringing out every nuance and flavour.

Intuitive LED touchscreen. The touchscreen control system with LED display makes it easy to select drinks and adjust settings, providing a convenient and modern user experience.

Speciality coffees at the touch of a button. Make Espresso, Americano, Lungo or hot water. It also features a double espresso function for making two coffees at the same time.

Built-in milk frother. Creates a smooth, creamy milk froth thanks to its built-in steamer. Ideal for making cappuccinos, lattes and other specialty coffees with a professional texture.

Adjust the coffee quantity between 7 and 12 g and select a drink volume of 20 to 250 ml.

Large-capacity water tank. The 1.1-litre water tank allows you to prepare several drinks in a row without having to refill it constantly.

A super-compact and functional design. It combines grinding, brewing and automatic maintenance systems in a single unit, while taking up minimal space.

Cremmaet Cube Stretta Steam Grey

Super-automatic coffee machine with built-in grinder. 19 bar. 1300 W. LED indicators. Integrated steamer.

FEATURES:

Ultra-compact super-automatic coffee machine. 16.5 cm wide. Designed to fit on small worktops without compromising on the full coffee experience. Ideal for modern kitchens. The 19 bar pressure ensures a more consistent coffee extraction, with better aroma development and a more consistent crema. An espresso with more uniform results in everyday use. Power 1300–1500 W: fast and consistent performance. Its power range allows working with ease during daily use. Less waiting time between coffees and smoother operation when making several cups in a row. Precise temperature control from the very first cup. Thermoblock technology designed to achieve the correct temperature from the very first coffee, without having to ‘wait for it to settle’. Greater consistency in flavour and crema right from the start. Built-in steamer – milk and froth just the way you like it. The steamer allows you to heat and texturise milk to make cappuccinos, lattes or macchiatos at home. Create a finer, more controlled froth by adjusting the texture to suit your recipe, for a creamier and more consistent result. Built-in grinder for freshly ground coffee. From bean to cup in a single machine to preserve freshness and aroma. A more premium experience without additional accessories on the worktop. The grinder with metal blades helps achieve a more uniform grind. This improves the consistency of extraction and makes it easier to replicate the result cup after cup. Touch button and LED display: clear and intuitive control. Adjust the coffee volume (ml) to suit your preferences. Set the amount of coffee extracted in millilitres to suit your cup and your recipe. Grind&Tamp Coffee Machines

Explore the range

Perfect tamping for a barista-quality result

Making a good speciality espresso at home has always come at a price: spilled coffee grounds, inconsistent pressure and cups that taste divine one day and watery the next. The secret lies in the tamping: neither too loose nor too firm; always even.

With Autotamping technology, the machine takes care of the most critical part of the process. So, in our new generation of Grind&Tamp coffee machines, we've enhanced the experience for coffee lovers who want to continue using portafilters, but without any margin for error.

AUTO-TAMPING TECHNOLOGY

Precise pressure, perfect extraction

Brew consistent espressos with superior crema and aroma thanks to its auto-tamping technology, regardless of your level of experience. After grinding the beans, it automatically applies constant and precise pressure to create a perfect coffee puck. The result? A balanced extraction, a dense crema and a spectacular flavour. Cup after cup, with no room for error.

Freshly ground coffee with the perfect tamp

AUTOMATIC GRINDING

From bean to cup

Grinds the coffee precisely, evenly and quietly. Provides the perfect grind size and texture for each variety of coffee beans.

TOUCHSCREEN

Easy and intuitive control

Its highly intuitive interface allows you to select and customise your drink instantly. It combines maximum ease of use with a sleek, cutting-edge design that brings a modern touch to your kitchen.

STEAM WAND¹

Froth milk like a barista

Its professional steam wand allows you to create lattes and cappuccinos with the perfect foam texture, on a par with the best speciality coffee shops.

¹Available on the Power Espresso Barista Grind&Tamp model.

Power Espresso Grind&Tamp Compact

Manual tamping coffee machine with integrated grinder. 15 bar. Touchscreen. 1350 W. Compact portafilter.

FEATURES:

Manual lever tamping: real control.
Tamping is carried out manually using a lever. It compacts the coffee with a precise and uniform pressure of 10 kg. The result: consistent extraction, a better crema and a professional-quality flavour, with no prior experience required.
Perfect espresso thanks to tamping: Tamping applies the same pressure to every coffee, preventing inconsistencies and channeling that lead to poor extraction and a poor coffee experience. Result: consistent flavour and quality in every cup, with fewer poorly extracted coffees.
Integrated grinder: freshly ground coffee on demand. The built-in grinder allows you to grind just before brewing, preserving aroma and freshness. Greater intensity in the cup and a more premium experience without the need for additional equipment.
A clear and intuitive user experience thanks to its 5.5-inch touchscreen. Its touchscreen makes it easy to control functions and select drinks.
Perfect extraction at 15 bar. The 15-bar pump ensures stable extraction of the ground coffee, with better aroma development and a more consistent crema. Greater balance in every cup, even during daily use.
Compact 45 mm portafilter designed for stable and clean extraction, integrated directly into the machine.
Optimised power for everyday use. With a power output of up to 1350 W, it delivers fast and consistent performance for making coffee and milk-based drinks without any waiting.
1-litre water tank: great runtime without taking up too much space. The 1-litre water tank offers an ideal balance between capacity and size. Fewer refills and a compact footprint in the kitchen.
A cleaner and tidier process.
By reducing tamping errors and failed extractions, splashes and wasted coffee during preparation are minimised. A cleaner process every time and a more enjoyable routine.
Its compact design takes up very little space, making it ideal for modern kitchens where design and space-saving are key, without compromising on advanced features. Ultra-compact design.

Power Espresso Barista Grind&-Tamp

Espresso machine with an Auto-Tamping system that ensures the coffee is perfectly compacted with minimal effort. Includes a stainless steel conical grinder, PID control, a 15-bar pump and professional 58 mm filters. Home barista results

FEATURES:

It automatically tamps the coffee with precise, even pressure. The result: consistent extraction, a better crema and a professional-quality flavour, with no prior experience required. Auto-Tamping system.
It distributes the ground coffee evenly before tamping, preventing clumping and ensuring a balanced extraction in every cup. Smart Distribution System.
It ensures a precise, even and quiet grind, preserving the natural aromas of freshly ground coffee. Built-in conical stainless steel grinder.
Thanks to PID technology and the NTC sensor, the coffee machine maintains a stable temperature throughout the process, ensuring a more precise extraction and consistent flavours.
High-efficiency Thermoblock system. The Thermoblock heater with a stainless steel water tube offers rapid heating, thermal stability and improved hygiene with every preparation.
Professional pressure of 15 bar. The professional 15-bar pump ensures optimal espresso extraction, producing a dense, long-lasting crema of barista quality.
58 mm professional filters. Fitted with Ø58 mm single-layer filters – the standard used in professional coffee shops – for a more uniform extraction and superior results.
Professional stainless steel steamer. The S.S. steam wand allows you to froth milk with precision, making it ideal for cappuccinos, lattes and drinks with a fine, silky foam.
Precise water flow measurement. The built-in flow meter precisely controls the amount of water used, improving the consistency and quality of every espresso.
Large removable water tank. With a 2.3-litre removable tank that's easy to refill, it's perfect for both intense home use and long coffee sessions.
Optimised power for advanced home use. With a power of up to 1770 W, it delivers fast, consistent and efficient performance, making it ideal for discerning coffee lovers.
Effortless professional-quality coffee at home
