ELECTRIC MOTORBIKES

2025

New releases, proven experience

We embarked on our electric motorbikes journey with the same philosophy that has established us a reference in the universe of electric scooters: to bring the best technology available to as many people as possible. Because the mobility of the future will only become a reality when people become part of it.

Electric mopeds

Conquer the city in full force

Designed with a motor of up to 3000 W and a maximum power of up to 3600 W for fast and precise acceleration response. Thus, they adapt to city traffic, offering agile, comfortable and silent mobility, allowing the sound of nature to infuse our streets.

3 driving styles

The city has its own rhythm and, with the different riding modes¹, the mopeds adapt to each situation to offer the perfect balance between power and range, allowing you to reach your destination while optimizing the battery to the maximum.

CITY MODE

Maximum speed of 30 km/h, perfect for urban commuting and energy saving.

EFFICIENT MODE

Speeds between 35 and 45 km/h, ideal for balancing performance and efficiency.

SPORT MODE

Maximum speed of 45 km/h, for those looking for a more dynamic riding.

Explore every corner of the city

No matter how big the city or how long the journey. Cecotec mopeds have a range of up to 45 km as standard. Need more autonomy? No problem, its design¹ allows the addition of a second battery to extend the range up to 90 km.

Charge it on the go

The removable battery design provides great convenience and flexibility when charging the batteries. At home, in the garage or at the office: keeping your motobike ready is as easy as removing the battery and plugging it into any outlet.

Dominate the streets

Every journey is different and changes along the way: curves, uneven asphalt, unforeseen events... An environment that needs a guarantee of safety, equipment to match and the latest technology to enjoy every kilometre.

TYRES

More stability

The wheels design ensures excellent grip and stability on a variety of surfaces, significantly improving riding safety and control. Available in 10", 12" or with a 12" front and 13" rear.

BRAKES

More safety

The riding experience is unique from start to stop, which is why our mopeds are equipped with disc and hydraulic brakes that offer fast and precise response for effective bike reaction.

SUSPENSION

More comfort

No matter the road conditions, thanks to the hydraulic suspension system, which effectively absorbs shocks and vibrations for a smooth and comfortable ride throughout the journey.

Cecotec Skull (Black/Red)

The SKULL electric moped is an efficient and agile option for urban commuting. Equipped with a 800 W motor and a maximum power of 1200 W, it offers optimal performance in the city. Its 48 V 20 Ah battery provides up to 40 km of range, ideal for daily journeys. With 12" pneumatic wheels, high-precision disc brakes and a removable battery, the SKULL combines comfort, safety and convenience for agile, worry-free city riding.

FEATURES:

Superior power and optimum performance: Equipped with an 800 W motor and a maximum power of 1200 W, the SKULL offers an agile riding experience and adapts to any urban environment.

Ideal autonomy for daily use: The 48 V 20 Ah battery provides up to 40 km of range per charge, perfect for daily urban commuting without worrying about frequent recharging.

Sturdy 12 inch wheels: Designed to offer maximum stability and grip on a variety of surfaces, significantly improving safety and control while riding.

High precision braking system: Disc brakes on both wheels ensure safe and efficient braking, providing fast and precise response in any situation.

Maximum speed of 45 km/h: Reaching up to 45 km/h, the SKULL is ideal for fast and efficient journeys in urban environments, ensuring you reach your destination safely and on time.

Removable battery for added convenience: The removable battery makes it easy to recharge wherever you go, giving you the freedom to charge at home, at the office or at any available charging point.

Lightweight and easy to handle: The SKULL is a light and easy to handle motorbike, very agile in urban environments and with the ideal range for daily urban commuting.

Complies with Spanish traffic regulations: Designed to comply with all Spanish traffic regulations, the SKULL ensures safe and legal riding on all public roads.

COMPOSITION:

Motorbike, battery and accessory kit with charger, side mirrors, key and repair kit.

Cecotec Piazza (Blue)

The PIAZZA electric moped is an efficient and agile option for urban commuting. Equipped with a Bosch 800 W motor and a maximum power of 1440 W, it offers optimum performance in the city. Its 48 V 26 Ah battery provides up to 45 km of range with a single battery and up to 90 km with the dual battery option, ideal for daily commuting. With 10" pneumatic tyres, high-precision disc brakes, removable battery and 3 riding modes, the PIAZZA combines comfort, safety and convenience for efficient and carefree city riding.

FEATURES:

Superior power and optimum performance: Equipped with an 800 W Bosch motor and a maximum power of 1440 W, the PIAZZA offers exceptional performance in urban environments, overcoming slopes with ease.

Long range: The 48 V 26 Ah battery provides up to 45 km of range with a single battery and up to 90 km with the dual battery option, ideal for long, daily rides.

Sturdy 10 inch wheels: The 10" pneumatic tyres ensure excellent grip and stability on a variety of surfaces, significantly improving riding safety and control.

High precision braking system: Disc brakes on both wheels ensure safe and efficient braking, providing fast and precise response in any situation.

Maximum speed of 45 km/h: Reaching up to 45 km/h, the PIAZZA is ideal for fast and efficient journeys in urban environments, ensuring you reach your destination safely and on time.

Removable battery for added convenience: The removable battery makes it easy to recharge wherever you go, giving you the freedom to charge at home, at the office or at any available charging point.

Ideal capacity for two people. The PIAZZA is designed to comfortably carry two people, with a maximum load capacity of 217 kg.

Elegant and modern style: With a sleek, modern design available in blue and beige, the PIAZZA is not only functional, but also an attractive incorporation to your urban lifestyle.

Complies with Spanish traffic regulations: Designed to comply with all Spanish regulations, the PIAZZA ensures safe and legal riding on all public roads.

The PIAZZA includes three riding modes to suit different needs:

City mode: Maximum speed of 30 km/h, perfect for urban commuting and energy saving.

Efficient mode: Speeds between 35 and 45 km/h, ideal for balancing performance and efficiency.

Sport mode: Maximum speed of 45 km/h, for those looking for a more dynamic riding.

Cecotec Shark (Grey/Lime)

The SHARK electric motorbike is a powerful and versatile option for urban commuting. Equipped with a 3000 W motor and a maximum power of 3600 W, it offers optimal performance in the city. Its 72 V 30 Ah battery provides up to 45 km of range with just a single battery, and up to 90 km with the dual battery option, making it the ideal option for long daily commutes. With 13" front and 12" rear wheels, hydraulic disc brakes and a removable battery, the SHARK combines comfort, safety and convenience for efficient and carefree city riding. In addition, its two-person riding capacity and modern design in Grey/Lime and Red/White make it an attractive and practical choice for any urban user.

FEATURES:

Superior power and optimum performance: Equipped with a 3000 W motor and a maximum power of 3600 W, the SHARK offers exceptional performance in urban environments, allowing you to overcome any obstacle with ease and maintain an agile and powerful ride.

Long range: The 72 V 30 Ah battery provides up to 45 km of range with a single battery and up to 90 km with the dual battery option, ideal for long, daily rides without worrying about the frequent recharging.

Sturdy wheels and high precision brakes: The 13" front and 12" rear wheels ensure excellent grip and stability on a variety of surfaces, while the hydraulic disc brakes on both wheels ensure safe and efficient braking, therefore providing fast and accurate response.

Maximum speed of 45 km/h: Reaching up to 45 km/h, the SHARK is ideal for fast and efficient journeys in urban environments, ensuring you reach your destination safely and on time.

Removable battery for added convenience: The removable battery facilitates easy recharging anywhere, providing you with the convenience of charging at home, at the office or at any available charging point, ensuring you're always ready for the next trip.

Ideal capacity for two people. The SHARK is designed to comfortably carry two people, with a maximum load capacity of 150 kg, making this moped a practical choice for both single and two-person riding.

Hydraulic suspension for a smooth ride: The hydraulic suspension system effectively absorbs road shocks and vibrations, providing a smooth and comfortable riding experience, even on uneven terrain.

Modern, sporty and youthful style: With a modern and sporty design, available in Grey/Lime and Red/White, the SHARK is not only functional but also an attractive addition to an urban and youthful lifestyle.

Complies with Spanish traffic regulations: Designed to comply with all Spanish traffic regulations, the SHARK ensures safe and legal riding on all public roads, giving you peace of mind on every journey.

Electric motorbikes

Pick up the pace

City or highway? It doesn't matter, as Cecotec motorcycles are designed to conquer any road thanks to a motor of up to 6000 W and a maximum power of up to 1700 W. You won't hear the roar of the engine, but its electric soul will make you hold on tight to the handlebars.

A mode for each journey

50 km/h around the city and up to 120 km/h on the highway. Each road is different and through the different riding modes you can take control over the power to adapt speed and acceleration, getting the most out of the battery thanks to the different settings (Eco, Balanced and Sport) of each mode¹.

CITY MODE

Maximum speed of 70 km/h, perfect for urban commuting.

EFFICIENT MODE

Maximum speed of 80 km/h, perfect for longer and more efficient journeys.

DYNAMIC MODE

Maximum speed of 120 km/h, for a faster and more intense riding experience.

Reach even further

With a range of up to 140 km, possibilities are endless. An ideal mobility option for daily use, to break with routine and travel to unknown areas. In addition, models with a range of up to 70 km allow a second battery to be added for double the range.

Charge it on the go

The removable battery design¹ provides great convenience and flexibility when charging the batteries. At home, in the garage or at the office. Keeping your motobike ready is as easy as removing the battery and plugging it into any outlet.

Enjoy every mile

Immediate acceleration, precise braking, smooth damping, great grip and stability. Our series of motorcycles has all the necessary equipment to offer the best riding experience on any journey, whether in the city or on the highway.

BRAKES

Maximum safety

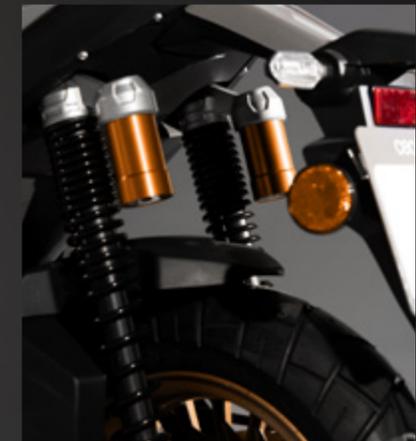

The motorcycles are equipped with hydraulic brakes or CBS to provide a fast, smooth and precise response when the brakes are activated, thus increasing safety in the event of unforeseen events and reducing risks.

TYRES

Great grip and stability

The design of its wheels (12", 13" and 14") improves driving performance, increases grip with the asphalt and provides more stability for the user to feel the road and enjoy a unique comfort.

SUSPENSION

Bump-proof

Comfort is taken to the next level thanks to the hydraulic suspension system, which absorbs shocks and vibrations caused by the terrain to make the ride so smooth it feels like the road is freshly paved.

Cecotec Shark RS (Silver/Blue)

The SHARK RS electric motorbike is a powerful and versatile choice for dynamic young people looking to move around in style. With a 3000 W motor and a maximum power of 5760 W, it offers exceptional performance both in town and on the road thanks to its 3 riding modes ECO, BALANCE and SPORT. Its 72 V 30 Ah battery provides up to 70 km of range with a single battery, and up to 140 km with a dual battery, ideal for long daily journeys. The 13" front and 12" rear wheels, together with hydraulic disc brakes, guarantee stability and safety. With a modern and sporty design in Silver/Blue and Anthracite/Red, the SHARK RS is not only efficient, but also an attractive addition to a youthful lifestyle.

FEATURES:

Surprising power for dynamic riding: With a 3000 W motor and an incredible maximum power of 5760 W, the SHARK RS gives you electrifying performance both in town and on the road. Feel the adrenaline rush as you climb steep slopes and enjoy a spirited, agile riding.

Extended autonomy for endless adventures: The 72 V 30 Ah battery provides up to 70 km of range with a single charge and up to 140 km with the dual battery option. Ideal for long daily commutes and getaways, without worrying about running out of battery.

Extreme precision wheels and brakes: The 13" front and 12" rear wheels ensure exceptional grip, while the hydraulic disc brakes provide safe and precise braking. Master any surface with confidence and style.

Impressive top speed of 80 km/h: With a speed of up to 80 km/h, the SHARK RS is perfect for ultra-fast and efficient journeys, both in the city and on the road. You'll reach your destination quickly and in style.

Removable battery for total comfort: The removable battery makes it easy to recharge wherever you go, giving you the freedom to charge at home, at the office or at any available charging point. You'll always be ready for the next adventure.

Designed for two people: With a capacity for two people and a maximum load of 150 kg, the SHARK RS is the perfect companion for enjoying the city in company. Share your trips and create unforgettable memories.

Hydraulic suspension for maximum comfort: The hydraulic suspension system absorbs every impact of the road, giving you a smooth and pleasurable riding experience, even on the roughest terrain.

Modern and sporty style that steals the show: With a bold and youthful design in Silver/Blue and Anthracite/Red, the SHARK RS not only stands out for its performance, but also for its impressive appearance. Drive in style and be the centre of attention.

Cecotec Halo (Silver/Green)

The HALO electric motorbike is a stylish and powerful option for professionals looking for a sophisticated and efficient means of transport. With a 7550 W motor and a maximum power of 10000 W, the HALO offers exceptional performance both in town and on the road thanks to its 3 modes EFFICIENT, BALANCE and SPORT. Its 74 V 28 Ah battery provides up to 120 km of range per charge, ideal for long, daily journeys. The 14" wheels and CBS brakes ensure optimum stability and safety. With a modern and sophisticated design in Silver/Green and Blue/Orange, the HALO is not only efficient, but also a perfect complement to a cosmopolitan lifestyle. Plus, its two-person riding capacity and removable battery add convenience and flexibility, making the HALO an ideal choice for the urban professional.

FEATURES:

Power and dynamism for sophisticated riding: With a 7550 W motor and a maximum power output of 10000 W, the HALO offers superior performance, ideal for urban and highway commuting, exceeding your expectations with ease and enjoying an agile and refined ride. Extended autonomy for people on the move: The 74 V 28 Ah battery provides up to 120 km of range, perfect for daily commuting without worrying about frequent recharging. Ideal for those who need efficiency and reliability on the move.

High precision wheels and brakes for maximum safety: The 14" wheels ensure exceptional grip and stability, while the CBS brakes ensure safe and efficient braking, offering confidence and control on every journey.

Maximum speed of 100 km/h: With speeds of up to 100 km/h, the HALO enables fast and efficient journeys both in the city and on the road, ensuring you reach your destination in style and on time.

Removable battery for convenience and flexibility: The removable battery makes it easy to recharge wherever you go, giving you the freedom to charge at home, at the office or at any available charging point. You'll always be ready for the next trip.

Ideal capacity for two people. With space for two people and a maximum load of 308 kg, the HALO is perfect for sharing your daily commute, offering comfort and practicality.

Hydraulic suspension for a comfortable ride: The hydraulic suspension system effectively absorbs road shocks, providing a smooth and pleasant riding experience, even on the most demanding routes.

Sophisticated and cosmopolitan style: With a sleek and modern design in Silver/Green and Blue/Orange, the HALO stands out for its sophistication and dynamism. Classy riding that leaves a lasting impression.

Safe and legal riding: Complying with all Spanish traffic regulations, the HALO ensures that every journey is legal and safe. Drive with confidence and enjoy every mile with peace of mind.

Cecotec Halo (Blue/Orange)

The HALO electric motorbike is a stylish and powerful option for professionals looking for a sophisticated and efficient means of transport. With a 7550 W motor and a maximum power of 10000 W, the HALO offers exceptional performance both in town and on the road thanks to its 3 modes EFFICIENT, BALANCE and SPORT. Its 74 V 28 Ah battery provides up to 120 km of range per charge, ideal for long, daily journeys. The 14" wheels and CBS brakes ensure optimum stability and safety. With a modern and sophisticated design in Silver/Green and Blue/Orange, the HALO is not only efficient, but also a perfect complement to a cosmopolitan lifestyle. Plus, its two-person riding capacity and removable battery add convenience and flexibility, making the HALO an ideal choice for the urban professional.

FEATURES:

Power and dynamism for sophisticated riding: With a 7550 W motor and a maximum power output of 10000 W, the HALO offers superior performance, ideal for urban and highway commuting, exceeding your expectations with ease and enjoying an agile and refined ride. Extended autonomy for people on the move: The 74 V 28 Ah battery provides up to 120 km of range, perfect for daily commuting without worrying about frequent recharging. Ideal for those who need efficiency and reliability on the move.

High precision wheels and brakes for maximum safety: The 14" wheels ensure exceptional grip and stability, while the CBS brakes ensure safe and efficient braking, offering confidence and control on every journey.

Maximum speed of 100 km/h: With speeds of up to 100 km/h, the HALO enables fast and efficient journeys both in the city and on the road, ensuring you reach your destination in style and on time.

Removable battery for convenience and flexibility: The removable battery makes it easy to recharge wherever you go, giving you the freedom to charge at home, at the office or at any available charging point. You'll always be ready for the next trip.

Cecotec Vulcano (White/Red)

The VULCANO electric motorbike is the brand's most powerful and sophisticated model. With a 6000 W motor and an impressive maximum power of 17000 W, it offers unrivalled performance both in town and on the road thanks to its 3 configurable modes Eco, Normal and Sport. Its 72 V 100 Ah battery provides an impressive range of up to 140 km. Equipped with 14" front and 13" rear wheels and CBS brakes, it guarantees safety and stability. Hydraulic suspension ensures a smooth and comfortable ride. Available in White/Red and Titanium/Gold, the VULCANO combines style, power and advanced technology for an unrivalled riding experience.

FEATURES:

Unrivalled power for supreme riding: With a 6000 W motor and a maximum power output of 17000 W, the VULCANO redefines the standard for electric motorbikes, offering outstanding performance both in the city and on the road. Overcome any obstacle with impressive ease and feel the superiority in every ride.

Extended autonomy for the most demanding journeys: The high capacity lithium battery (72V 100Ah) provides a range of up to 140 km, allowing you to travel long distances without worrying about recharging. Perfect for those riders who need reliability and efficiency in their daily commute and long journeys.

Mixed wheels and maximum precision brakes: The 14" front and 13" rear wheels offer exceptional grip and stability, while CBS brakes ensure safe and efficient braking. Master any surface with confidence and security.

Maximum speed of 120 km/h: The VULCANO reaches speeds of up to 120 km/h, allowing you to make fast and efficient journeys both in the city and on the road. Get to your destination with speed and style like no other.

Strong and sporty design: With a bold design in two colours to be chosen, the VULCANO not only stands out for its performance, but also for its impressive appearance. This motorbike is a symbol of sophistication and power on the road.

Comfortable seat for two: Designed to comfortably carry one or two people, the VULCANO can carry a maximum load of 337 kg, making it perfect for any transport need without compromising on comfort.

Hydraulic suspension for carefree riding: The suspension system with inverted fork and twin rear gas shock absorbs road shocks and vibrations effectively, providing an extremely comfortable and enjoyable riding experience, even on the most challenging terrain.

State-of-the-art technology for maximum efficiency: The VULCANO incorporates advanced technology to optimise and control every aspect of your journey. From energy efficiency to comfort and safety, every detail has been carefully designed to offer an unrivalled riding experience using its TFT display.
