9 treatments for younger-looking skin.

ORANGE LED LIGHT

Glow treatment

Restores natural radiance.

RED LIGHT + IR

Anti-ageing treatment

Smooths out wrinkles and fine lines.

YELLOW LED LIGHT

Sensitive treatment

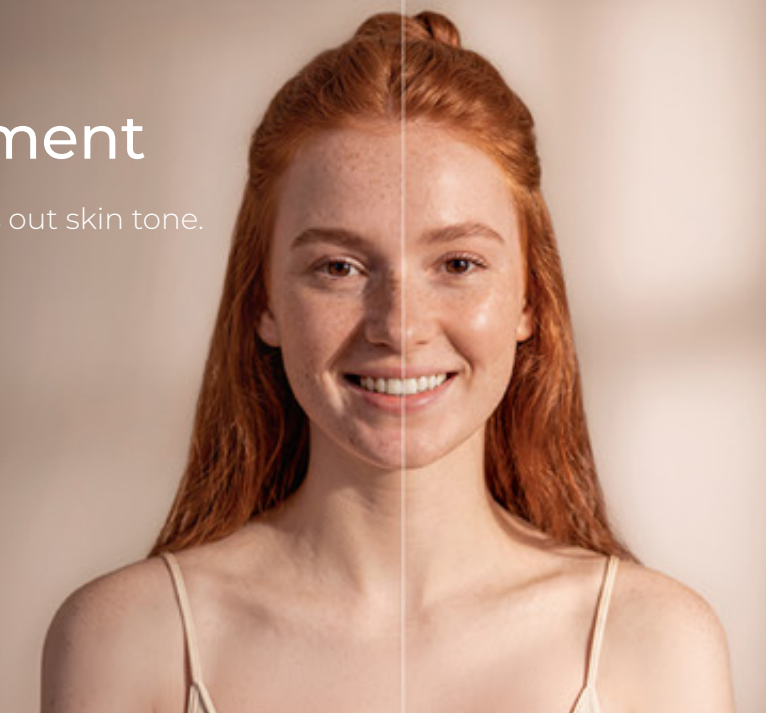

Calms red spots. Ideal for sensitive skin.

GREEN LIGHT + IR

Balance treatment

Lightens dark spots and evens out skin tone.

BLUE LIGHT + IR

Purity treatment

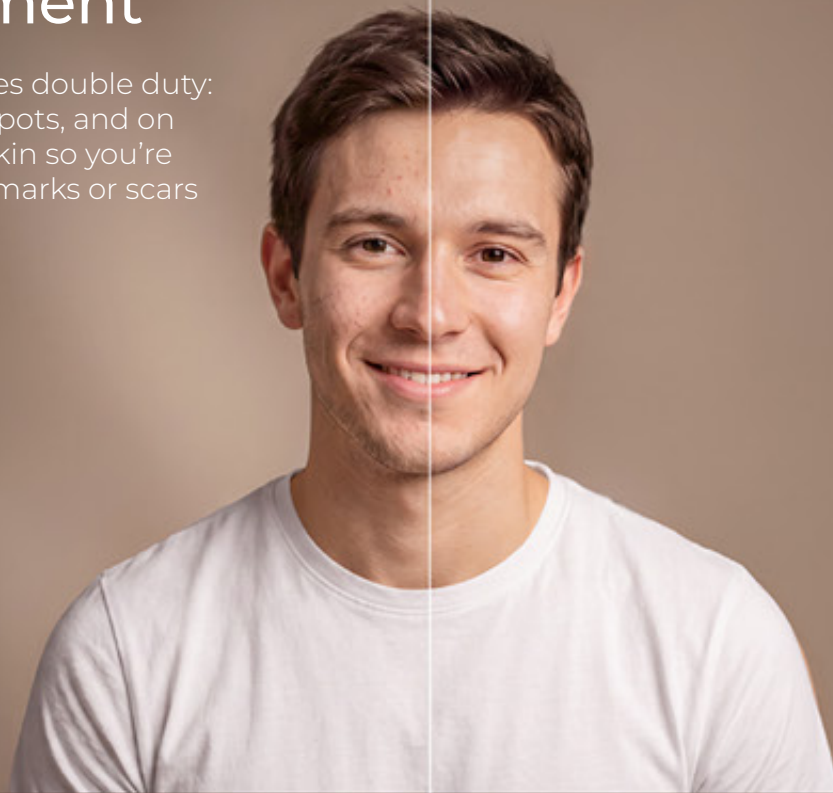

Helps combat acne and oily skin.

PURPLE LED LIGHT

Renew treatment

Acne without scarring. It does double duty: on the one hand, it tackles spots, and on the other, it helps heal the skin so you're not left with the usual dark marks or scars afterwards.

WHITE LED LIGHT

Lift treatment

General lifting effect. It's the all-round solution for tackling sagging skin.

CYAN LED LIGHT

Spa treatment

Relaxation and stress-free skin. It acts as a soothing spa for your face.

INFRARED

Repair treatment

Deep repair. It works on the deepest layers of the skin, where creams cannot reach.

Up to 480 diodes for complete regeneration.

With up to 480 LED chips that guarantee full coverage and deep-acting treatment for more radiant, balanced and revitalised skin.

ICE accessory for fresher-looking skin

Its removable cold gel layer provides a soothing and revitalising effect, helping to refresh the skin and enhancing the feeling of comfort with every use.*

*Available in the FaceCare Lüm Ice model.

Medical-grade silicone

It ensures safe and comfortable contact with the skin, combining softness, hypoallergenic properties and adaptability for all types of users.

Designed to protect the skin and guarantee a pleasant experience, even for sensitive skin, it provides peace of mind and gentle care with every application.

FaceCare LÜM

LED facial mask with 9 colours and functions, infrared, 360 light points and medical-grade silicone.

FEATURES:

A facial mask featuring 9 different LED colours, allowing you to switch between modes with different functions within a single product (red, blue, yellow, purple, green, white, cyan, orange, and infrared).

Red light + IR (630 nm + 830 nm). Anti-wrinkle and firming. It's your anti-ageing ally. It helps to smooth out wrinkles, minimise fine lines and leaves the skin looking firmer, more supple and younger.

Blue light + IR (460 nm + 830 nm). Goodbye spots and oily skin. Perfect for drying out spots more quickly, thoroughly cleansing pores and controlling that annoying oily shine on your face.

Yellow light (630 nm + 520 nm). Calms red spots. Ideal for sensitive skin. If your skin gets irritated easily or your face tends to be red, this light acts as a natural soothing agent that reduces inflammation.

Purple light (630 nm + 460 nm). Acne without scarring. It does double duty: on the one hand, it tackles spots, and on the other, it helps heal the skin so you're not left with the usual dark marks or scars afterwards.

Green light + IR (520 nm + 830 nm). Prevents blemishes and evens out skin tone. It helps to lighten dark spots caused by sun exposure or ageing. It leaves the complexion looking much more even and balanced.

White light (630 nm + 465 nm + 520 nm). General lifting effect. It's the all-round solution for tackling sagging skin. It acts as a general firming agent to make the face and neck look firmer and smoother.

Orange light (600 nm). Radiance and a healthy glow. It's like a vitamin boost. It revitalises dull or tired skin and instantly restores its natural, healthy glow.

Cyan blue light (500 nm). Relaxation and stress-free skin. It acts as a soothing spa for your face. It relaxes the skin when it feels tight or tired and provides a sense of relief and relaxation.

Infrared (IR) (830 nm). Deep repair. It works on the deepest layers of the skin, where creams cannot reach. It heals the skin from within and makes the effects of other light treatments work much better and faster.

Full coverage (90 LEDs / 360 LED chips), with more light points for more even illumination across the entire face.

Made from flexible, medical-grade silicone that moulds to your face like a second skin, ensuring maximum comfort and effectiveness for all skin types. Furthermore, it is UV-free.
