Hairdryers with sensor technology

Explore the range

Technology designed to care for your hair

INFRARED¹

Smooth and shiny finish

Gently penetrates the scalp to improve hair health. This technology helps reduce excess oil and the appearance of dandruff, contributing to healthier hair. Boosts hair health for a healthier, well-cared-for look.

DISTANCE SENSOR²

Smart drying, zero damage

Thanks to its artificial intelligence system, the hairdryer automatically detects the distance to the scalp and precisely adjusts the temperature. This prevents excessive heat and protects the hair and scalp.

SMART TECHNOLOGY³

A personalised experience

Attach the accessory and the hairdryer recognises it, adjusting its operation so that each attachment works with the most suitable settings.

SCALP PROTECTION MODE⁴

Protected hair with every use

Designed to care for and maintain scalp health during drying.

TRIPLE HEAT PROTECTION⁵

Maximum care with every drying

Maintains a constant temperature, protecting hair from heat damage and ensuring safe, uniform, and effective drying.

¹Available on the DryGlam™ Waves i-Sensor Pro model.

² Available on the following DryGlam™ models: Waves i-Sensor Pro, iSensor A.I., 2in1 Sensor and Waves Sensor 6in1.

³ Available on the DryGlam™ iSensor A.I model.

⁴ Available only on the DryGlam™ 2in1 Sensor model.

⁵ Available only on the DryGlam™ Waves Sensor 6in1 model.

Innovation that adapts to your style

PLASMA TECHNOLOGY

Say goodbye to frizz

With 1 billion ions, it helps eliminate static electricity, combat frizz, and enhance the hair's natural shine. The result: softer, shinier, and easier-to-style hair after each use.

UP TO 5 SMART MODES

Personalised drying for every situation

Choose from its different modes to adapt the power and temperature to your individual needs.

TOUCH SENSOR⁶

Activates when picked up, pauses when put down

The hairdryer switches on automatically when you pick it up and pauses when you release the handle, remaining on standby so it can resume instantly. A more comfortable, efficient, and safer system.

BRUSHLESS MOTOR WITH UP TO 1600 W OF POWER

Powerful and long-lasting performance

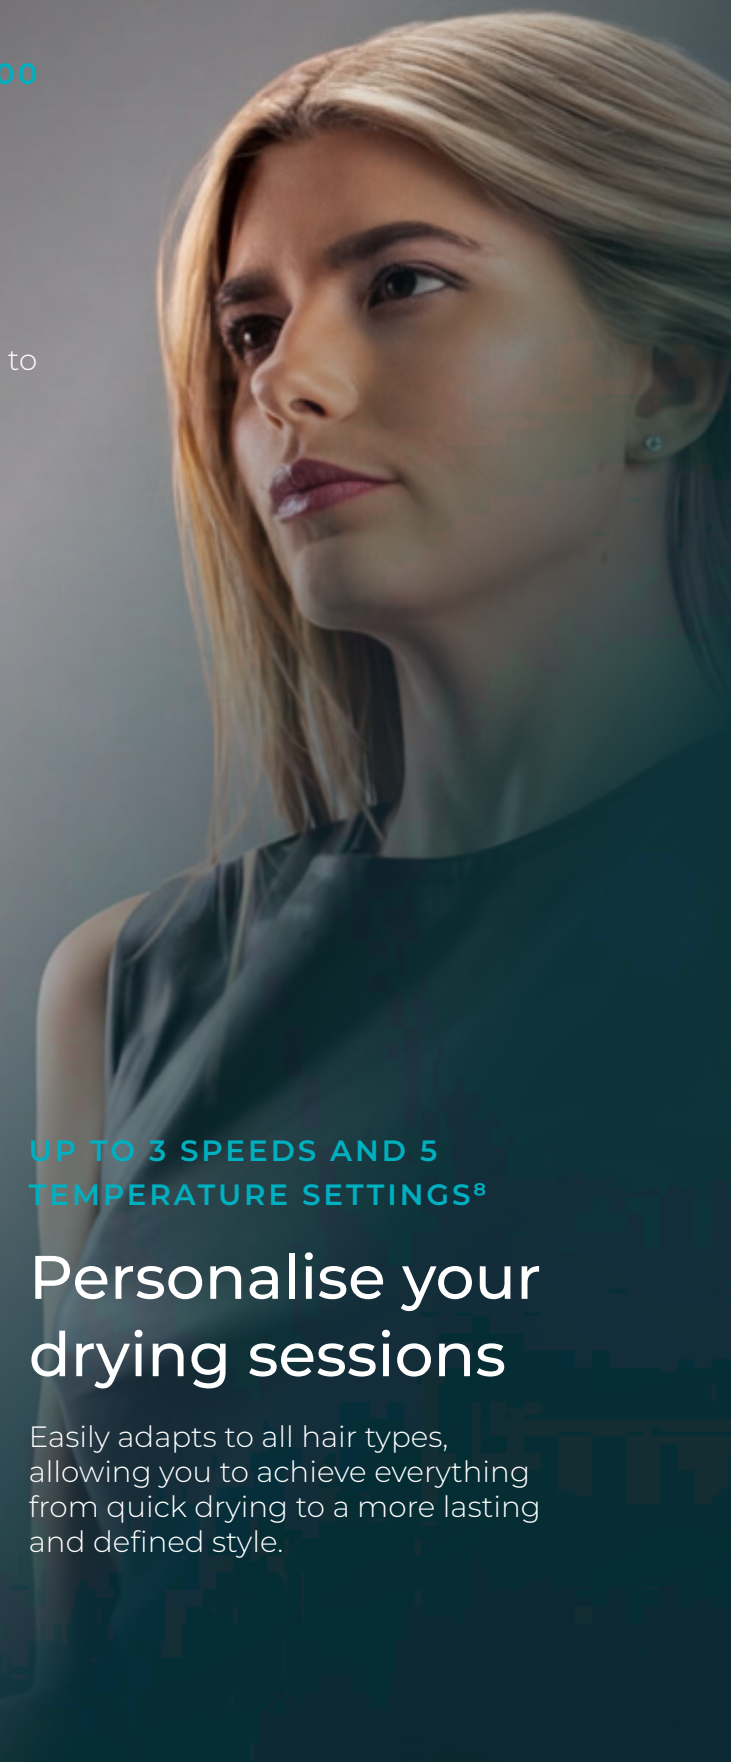

With up to 110,000 rpm and an airflow of up to 25 m/s, it offers fast, efficient, durable drying with a lower noise level, maintaining high performance and greater motor durability.⁷

UP TO 3 SPEEDS AND 5 TEMPERATURE SETTINGS⁸

Personalise your drying sessions

Easily adapts to all hair types, allowing you to achieve everything from quick drying to a more lasting and defined style.

6 ATTACHMENTS

2 concentrators

A standard concentrator nozzle for daily use and a narrower one for more precise and controlled drying.

Anti-Frizz

Reduces frizz and static electricity from the root, leaving hair soft, manageable, and with a more polished and elegant finish.

2 Coanda attachments

Create defined and long-lasting waves with a soft and natural finish, thanks to the Coanda effect that wraps the hair and facilitates styling.

Diffuser

Perfect for curly hair, as it enhances natural curls and waves, providing greater volume and frizz control.

**Versatility
tailored to you**

DryGlam Waves Sensor 6in1

Brushless hair dryer with distance sensor technology, ions, 6 attachments, triple heat protection, 1400 W, 110,000 rpm

FEATURES:

The distance sensor automatically adjusts heat according to proximity to the hair, protecting against excessive heat damage and maintaining hair health. Distance sensor technology. This hair dryer offers fast and efficient drying with less noise and greater durability. High-performance brushless motor with 1400 W and 110,000 rpm. Reduces frizz and improves hair shine, leaving it soft and manageable after each use. Ionic technology. Maintains a constant temperature to protect hair from heat damage, ensuring safe and effective drying. Triple heat protection technology. The memory function remembers your preferred temperature and speed settings, facilitating personalised and comfortable use each time. Memory function. Provide an enveloping airflow that takes care of each hair strand and curls it perfectly. With 2 Coanda attachments. Smoothes and controls frizz, leaving a soft finish. Antifrizz. Facilitates styling and straightening, offering a smooth and perfect finish with ease. Styling brush. Perfect for defining curls and adding volume without frizz. Diffuser. For precise and targeted drying. Concentrator nozzle. Customise your hairstyle. 3 speeds and 5 temperatures.

COMPOSITION:

Product, concentrator nozzle, diffuser, 2 Coanda attachments, anti-frizz, styling brush, instruction manual

- 35.5 x 31 x 7.5 cm 1.65 kg

DryGlam Waves i-Sensor Pro

Brushless hair dryer with Infrared technology, distance sensor, Plasma, 6 attachments, Touch Sensor, 1600 W.

FEATURES:

Penetrates the scalp, improving its health by reducing oil production and dandruff. This internal heating method helps maintain a balanced scalp and healthier hair. Infrared technology. Adjusts the air temperature to maintain a constant and recommended thermal sensation. This protects both the scalp and hair from excessive heat damage. Automatically detects the distance between the dryer and hair. Eliminates static electricity, reduces frizz and improves hair shine, leaving hair soft and manageable after each use. Plasma technology with 1 billion ions. Offers complete customisation for every need: AI Mode, Long Hair Mode, Short Hair Mode, Isothermal Mode, Pet Mode, and Baby Mode. Customise the drying. The airflow is automatically activated when detecting the hand on the handle, and stops it when placed on a surface, keeping the hair dryer switched on for efficient and safe use. Touch Sensor. Delivers powerful and long-lasting performance, guaranteeing fast and efficient drying with less noise. 1600 W Brushless motor. Enjoy a versatile and complete styling experience. With 6 accessories. Create perfect waves, offering a smooth and elegant finish. 2 Coanda heads. Includes two concentrators: one standard and another narrower for precise airflow. 2 concentrators. Helps eliminate frizz and smooth hair, providing a polished and elegant finish. Antifrizz. Ideal for curly hair: enhances natural curls and waves, providing volume and definition without frizz. Diffuser. Elegant and luxurious design. Leather-effect handle, platinum finish, and premium leather case. Achieves powerful and effective drying in less time. Features 110,000 rpm and 25 m/s airflow. Customise the drying. Features 2 speeds and 4 temperatures: High, Low, Cold Air, Oscilating.

DryGlam iSensor A.I.

Compact and lightweight BLDC hairdryer with a distance sensor (automatic heat adjustment), Smart technology with accessory recognition, touchscreen, 1200 W motor running at 150,000 rpm, and a set of 10 accessories (Coanda 30/38 mm, straightening brushes, comb, nozzles, diffuser, essential oils and infrared).

FEATURES:

Compact and lightweight design for more comfortable everyday use: makes it easier to handle during styling sessions and improves manoeuvrability when working in sections, from roots to ends. Compact size: lightweight and comfortable. The proximity sensor detects how close the hair is and automatically adjusts the temperature, helping to prevent excessive heat when the dryer is held too close and providing a sense of continuous control during drying and styling. Smart heat sensors. Attach the accessory and the hairdryer recognises it, adjusting its operation so that each nozzle works with the most suitable settings. This minimises 'trial and error' and makes it easier to achieve a more even finish. Smart technology: accessory recognition + automatic adjustment. Clear, visual settings allow you to change configurations quickly while styling, for a more intuitive and 'smart' experience. Touch display. 1200 W BLDC motor with up to 150,000 rpm to generate a powerful and agile airflow: designed to speed up drying and improve styling efficiency, reducing the time spent on getting ready. High-performance motor. Includes various modes and a set of 10 accessories to cover all your styling needs with a single device: shaping with Coanda (30/38 mm), smoothing and softening with brushes (soft and hard), straightening and controlling with a comb, targeted drying with nozzles (regular and professional), defining with a diffuser, and special attachments such as essential oils and infrared to enhance your routine. Kit with 10 accessories. Makes styling easier, helping you create waves and curls with a soft, elegant finish, using the airflow to shape your hair with greater control and adjusting the diameter to suit the type of curl you're aiming for. 30 mm and 38 mm Coanda barrels. It helps to smooth and polish the hair while drying, improving control over the finish for a more uniform look with less visible frizz. Soft & Hard smoothing brush. Guides the hair while drying for a more even and controlled result, ideal when you're looking for a smooth, defined finish with less effort. Straightening comb.

COMPOSITION:

Product, attachments: Big Nozzle, Diffuser, 30 mm Coanda Barrel, 38 mm Coanda Barrel, Small Nozzle, Smooth Flyaway 1, Smooth Flyaway 2, Infrared head, Essential oil attachment, Smooth brush nozzle, instruction manual

Hairdryers with essential oils

Explore the range

IONICARE DRY&KERATIN™

The first hairdryer that treats your hair with a BLDC motor

Discover the revolution in hair care with NutriEssence Tech. This innovative dryer not only dries your hair but also transforms it.

NutriEssence technology

It has a head infused with 7 essential oils that protect and nourish your hair, leaving it visibly more hydrated, shiny and healthy.

Peony and myrtle

Its multiple benefits provide hydration, softness and shine to the hair, while combating frizz.

Argan and jojoba

Reduces frizz and adds healthy shine for a visibly hydrated look.

Proteins and aminoacids

Specially formulated to strengthen, repair and revitalise damaged hair, restoring its natural vitality and resilience.

Argan Oil

Deeply moisturises, repairs the hair fibre and strengthens the hair from the inside. Provides softness, shine and protection against damage and breakage.

Ionic function

Negative ion generator that reduces frizz, leaving hair softer, shinier and more manageable.

Built-in ring

As it heats up, it gradually releases the essence and distributes it evenly throughout the hair, providing hydration, softness and shine during drying.

IoniCare Dry&Keratin Cotton Candy

Brushless hairdryer with NutriEssence technology, 107,000 rpm, ionic function, helps to protect, moisturise and nourish hair

FEATURES:

Includes an attachment that distributes the essence throughout your hair for hydrated, shiny, nourished and cared-for hair. NutriEssence Tech.
Achieve a more hydrated, smooth, shiny and frizz-free hair. This essence contains peony and myrtle oils, which are ideal for the hair due to their multiple benefits.
Helps reduce frizz, adds shine and helps maintain a hydrated appearance. In addition, it protects hair during blow-drying to make it more manageable, leaving a stronger appearance. The essence also includes keratin, argan oil and jojoba oil.
Especially suitable for damaged hair. With proteins and amino acids in the hair dryer head. Achieve beautifully scented hair after use. Scented essence.
Facilitates essence distribution through hair. Includes hard bristles as a brush.
The ring incorporated in the head melts with the heat provided by the hair dryer, helping the essence and scent to be released and distributed through your hair. NutriEssence Tech.
Quieter, more powerful, faster, longer-lasting and efficient. 1200 W Brushless motor with 107,000 rpm.
More comfort and better transport. Super compact and lightweight.
Negative ion generator to eliminate hair frizz. Ionic function.
As heat is applied to the capsule, it gradually melts until it disappears (approximately 2 months). It needs to be replaced when this happens if you want to continue adding the essence to your hair. Includes a NutriEssence Tech refill.
Dries hair precisely and easily. Concentrator.

IoniCare iSensor Essence

IoniCare iSensor Essence - 110,000 RPM Hairdryer with Temperature Sensor, Infrared and Anti-Frizz Plasma Technology, 8 Modes, Fast Drying, Lightweight and Scalp Care

FEATURES:

Sensor technology. Dynamic Temperature Control: Total comfort, no burns. This smart hairdryer detects distance and adjusts air temperature in real time. If you bring it too close to the roots, it reduces heat to prevent burns; if you move it away, it maintains perfect and constant temperature. Enjoy completely safe and comfortable drying at all times. Always maintains a constant temperature sensation. Infrared Technology. Our far infrared ray technology penetrates directly to the hair's core. This drastically accelerates moisture evaporation from the roots, thus minimising drying time and adapting to any daily situation with unbeatable efficiency. The gentle, deep heat of infrared protects the hair fibre from damage by overheating. To prevent excessive dryness, it naturally seals the cuticles, which drastically reduces frizz and prevents split ends. Your hair will look more elastic, resilient, soft, and full of life. Infrared rays gently stimulate scalp blood flow, facilitating nutrient delivery to the follicles. This not only helps strengthen hair from its roots but also relieves fatigue, reduces annoying itching, and minimises the appearance of dandruff. Treatment diffuser attachment: Nourishment and shine in each pass. Elevate your routine to another level. This exclusive diffuser attachment allows you to incorporate your favourite serum, argan oil, or hair treatment directly into the hairdryer. When activated, the airflow micro-sprays your cosmetic, distributing it 100% homogeneously throughout your hair without leaving residue or weighing it down. Dries, deeply hydrates, and boosts shine in a single step, saving time and maximising your products' results. Equipped with a 110,000 rpm brushless motor, its advanced air channel compresses and expels the flow at an incredible speed. By multiplying the force of the enveloping air, it dries even the densest hair in the blink of an eye, without the need for extreme temperatures. 8 drying modes: cool, warm, or hot air, alternating cool/hot cycles, and high or low speeds. This versatility allows you to adapt drying precisely to your hair type, protecting both the scalp and the fibre structure. Plasma Technology. Say goodbye to static electricity and unruly hair. Advanced Plasma technology emits ions that smooth the cuticle, leaving hair supremely manageable and shiny. Furthermore, its cool shot function sets your hairstyle to last all day. All this in an exceptionally lightweight, compact, and portable design, so you can enjoy top-quality care without arm fatigue, wherever you are.

3 motor types for all hair types

Explore our 3 different motors and find out which hairdryer best suits your hair.

BLDC MOTOR

Digital, lightweight and durable

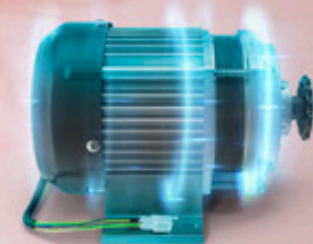

The Brushless motor is more powerful, durable and quieter than other hairdryers with other types of engines. Ideal for voluminous manes and thicker hair thanks to its fast and even drying time. Enjoy a gentle and practical blow-dry on a daily basis.

DC MOTOR

Energy-efficient motor

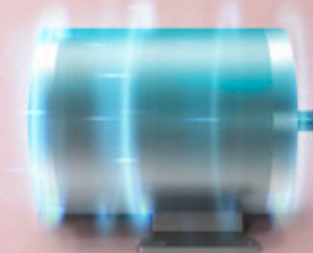

The DC motor favours low power consumption due to its lower air flow compared to other motor types. This type of motor is ideal for fine and frizz-free hair that dries easily.

AC MOTOR

Effective and powerful

With a high airflow, the AC motor is powerful enough to dry all types of hair and is easy to use over a long period of time thanks to its long lifespan.

A promotional image for hairdryers. In the foreground, a woman with long dark hair is shown in profile, looking upwards and to the right, holding a gold and black hairdryer. In the background, a woman with long blonde hair is shown from the waist up, looking towards the camera, also holding a similar hairdryer. The background is a solid teal color with a vertical light-colored rectangular element on the right.

Brushless hairdryers

Explore the range

PLASMA TECHNOLOGY¹⁰

The future of anti-frizz

Plasma technology compensates the humidity level by combining positive and negative ions that restore the hair's natural moisture and control frizz, leaving a silky, nourished and sleek mane.

Accessories for every occasion

Create your style with our brushless dryers and their innovative accessories. Curl your hair with the diffuser, create soft waves thanks to Coanda technology, straighten it precisely using the concentrator nozzles and add volume with the volumising attachment. Everything you need to achieve the look you want, in one device.¹¹

¹⁰ Available only on IoniCare RockStar Nano IonTech, DryGlam™ Waves Champagne, and DryGlam™ Nano Plasma models.

¹¹ Magnetic accessories are available on IoniCare 6000 RockStar Ice, IoniCare 6000 RockStar Fire, DryGlam™ Waves, and DryGlam™ Nano Plasma models. The number and type of attachments included may vary depending on the model.

Digital display¹²

Easily adjust and view the temperature and air speed for complete control over drying. Achieve perfect results easily and intuitively by adapting the heat flow to your hair's needs.

Lightweight and compact

Its ergonomic design offers easy and comfortable handling, ideal for taking it everywhere.

DRYNOVA TRAVEL

Choose your preferred finish

DryGlam Nano Plasma

State-of-the-art brushless hair dryer, 110,000 RPM and 1600 W power, Plasma function, high airflow, quiet and long-lasting.

FEATURES:

It emits negative and positive ions, neutralising frizz and leaving hair softer and shinier. This technology helps to maintain the hair's natural moisture, preventing frizz and improving manageability. Plasma Technology.

Achieve softer, more manageable hair. Enjoy a flawless look and no static electricity all day long. Neutralises static electricity.

Precisely adjust the heat to protect your hair from thermal damage. This advanced technology ensures that every strand receives the care it needs, maintaining its health and vitality while achieving your desired style. Controlled and optimised temperature.

Its powerful 110.000 rpm and 1600 W motor allows you to dry your hair more efficiently, quickly and quietly. Brushless motor.

The air flow of 21 L/s is ideal for those seeking quick results without compromising hair care. Powerful air flow.

Customise your blow-drying experience with its 3 speeds and 3 temperature settings, including a cool air option to set styles and protect hair from excessive heat. 3 speeds and 3 temperatures.

Includes a concentrator nozzle and a diffuser, essential accessories to achieve precise and defined hairstyles. The concentrator nozzle is ideal for straightening and styling, while the diffuser is perfect for enhancing natural curls and waves. Accessories included.

DryGlam Nano Plasma Blue

State-of-the-art brushless hair dryer, 110,000 RPM and 1600 W power, Plasma function, high airflow, quiet and long-lasting.

FEATURES:

It emits negative and positive ions, neutralising frizz and leaving hair softer and shinier. This technology helps to maintain the hair's natural moisture, preventing frizz and improving manageability. Plasma Technology.

Achieve softer, more manageable hair. Enjoy a flawless look and no static electricity all day long. Neutralises static electricity.

Precisely adjust the heat to protect your hair from thermal damage. This advanced technology ensures that every strand receives the care it needs, maintaining its health and vitality while achieving your desired style. Controlled and optimised temperature.

Its powerful 110.000 rpm and 1600 W motor allows you to dry your hair more efficiently, quickly and quietly. Brushless motor.

The air flow of 21 L/s is ideal for those seeking quick results without compromising hair care. Powerful air flow.

Customise your blow-drying experience with its 3 speeds and 3 temperature settings, including a cool air option to set styles and protect hair from excessive heat. 3 speeds and 3 temperatures.

Includes a concentrator nozzle and a diffuser, essential accessories to achieve precise and defined hairstyles. The concentrator nozzle is ideal for straightening and styling, while the diffuser is perfect for enhancing natural curls and waves. Accessories included.

IoniCare Dry&Keratin Olive

Brushless hair dryer with NutriEssence technology, 107,000 rpm, 1200 W and ionic function.

FEATURES:

Includes an attachment that distributes the essence throughout your hair for a hydrated, shiny, nourished and cared-for hair. NutriEssence Tech.
Achieve a more hydrated, smooth, shiny and frizz-free hair. This essence contains peony and myrtle oils, which are ideal for the hair due to their multiple benefits.
Helps reduce frizz, adds shine and helps maintain a hydrated appearance. In addition, it protects hair during blow-drying to make it more manageable, leaving a stronger appearance. Oil with keratin, argan oil and jojoba oil.
Especially suitable for damaged hair. With proteins and amino acids in the hair dryer head. Achieve beautifully scented hair after use. Scented essence.
Facilitates essence distribution through hair. Includes hard bristles as a brush.
The ring incorporated in the head melts with the heat provided by the hair dryer, helping the essence and scent to be released and distributed through your hair. NutriEssence Tech.
Quieter, more powerful, faster, longer-lasting and efficient. 107,000 rpm Brushless motor with 1200 W power.
More comfort and better transport. Super compact and lightweight.
Negative ion generator to eliminate hair frizz. Ionic function.
As heat is applied to the capsule, it gradually melts until it disappears (approximately 2 months). It needs to be replaced when this happens if you want to continue adding the essence to your hair. Includes a NutriEssence refill.
Dries hair precisely and easily. Includes a concentrator nozzle.

COMPOSITION:

Product, concentrator nozzle, NutriEssence attachment, replacement ring, instruction manual.

DryNova FastDry

FEATURES:

High-speed BLDC motor. Features a BLDC motor capable of reaching up to 80,000 rpm, designed to generate a high-speed airflow. Powerful enough to dry your hair in less time and make your daily routine easier.

Motor service life of 1,000 hours. The motor is designed to offer a service life of 1,000 hours. A feature designed to support you for longer during your hair-drying and styling sessions.

Plasma function. Its plasma function complements the drying and styling routine. Integrated technology for a more complete user experience with every session.

ToF technology. It features ToF technology, a sensor that detects the distance between the hairdryer and your hair. This function helps to manage heat more intelligently while drying.

3 speeds and 3 temperatures. Customise each use with its 3 speed and 3 temperature settings. Choose the combination that best suits your hair, the level of moisture or the finish you want to achieve.

Touch control. Adjust the speed and temperature using its touch control. Comfortable and intuitive handling allows you to change the settings easily while drying.

Cool air. Activate the cool air blast at the end of styling to add the finishing touch. A handy function for setting your hairstyle after drying.

Detachable filter. The removable filter makes it easy to clean and maintain the hairdryer. Remove it to clear away any accumulated dust or debris and help keep the appliance in good condition.

DC hairdryers

Explore the range

DC MOTOR

Efficiency, savings and dazzling results

UP TO 2500 W

Perfect power

Not all manes need the same drying power. Discover our DC hairdryers with a power range from 2000 to 2500 W and enjoy efficient and even drying on all hair types.

IONREAL

Frizz-free drying

Our IonReal technology projects negative ions onto the hair during drying. In this way, it counteracts the positive ions naturally present in the hair, eliminating frizz and leaving your mane radiant and manageable.

IoniCare 5200 Aura

DC hair dryer, 2300 W, with ionizing function and great flow rate.

FEATURES:

Powerful new-generation motor for fast and even drying. 2300 W.
Gets your hair to shine brighter, moisturizes it and avoids frizzing. Real Ion.
Dries hair quickly. It emits a large flow of air.
Pro Style. Cares for the hair by improving cuticle sealing for an ultra-shiny finish without colour loss.
Professional straightening. Precision nozzle.
Helps to get natural maximum volume at the roots and define curls easily with long-lasting finishes. Diffuser.
Protects hair from extreme heat. Hair Care technology.
Cool air function: gives extra hold to your hairstyle to keep it perfect and durable for a longer period of time. Cool air function.
Total control. Choose the ideal settings for your hair and hairstyle. It has two speed settings and three temperature settings. Temperature and speed adjustment.
Use the dryer comfortably anywhere, with complete freedom of movement. Includes a 1.8 m cable.

IoniCare Power&Go Heaven

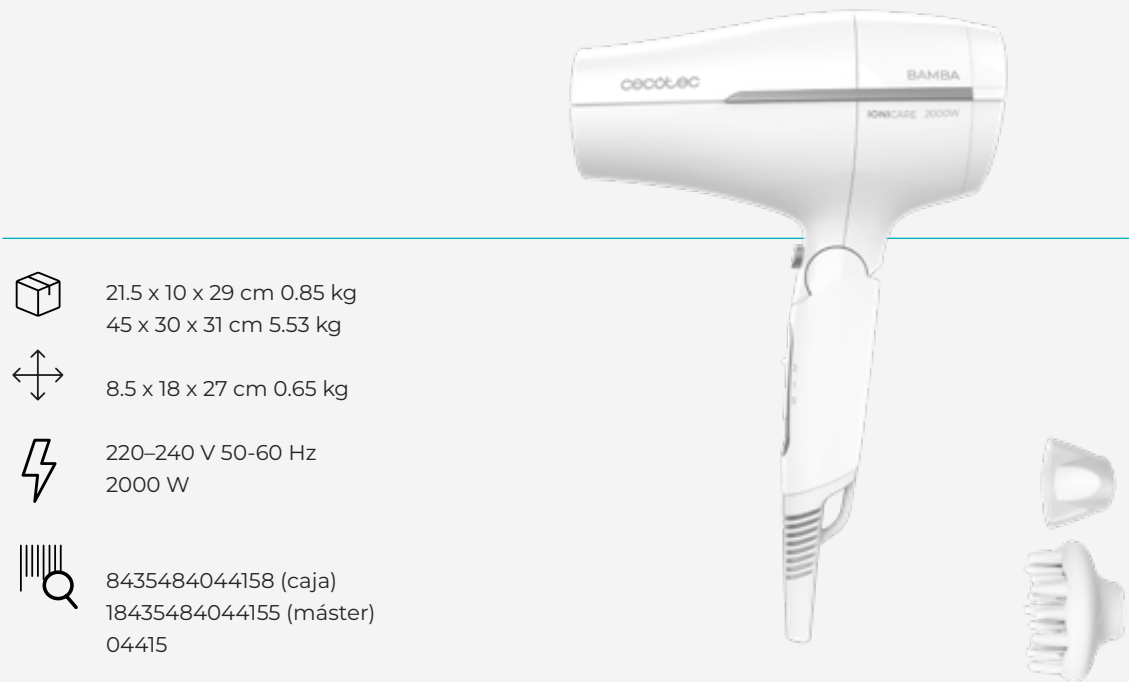

Travel hair dryer with 2200 W, 2 temperatures, 2 speeds, cold air button, concentrator nozzle and diffuser.

FEATURES:

High power: it has a 2000 W motor, which dries hair quickly and efficiently.
Travel dryer: designed to be easy to carry and store in your suitcase, handbag or backpack without worries.
Precision nozzle and diffuser: includes a concentrator nozzle to help perfect your hairstyles, as the air comes out much stronger and more directed, and a diffuser to take care of your curls wherever you go.
Our hair dryer features Hair Care technology, which protects your hair against overheating, ensures hair protection, brightness and flexibility, and avoids colour loss.
Adapts to your hair: 2 modes with different speed and temperature settings to suit all hair types.
Seals the cuticle: blow-drying your hair with cold air helps to seal the cuticle and prevent breakage.
Easy to clean: the filter of our dryer is very convenient and easy to clean thanks to the removable rear grille. It also extends the lifespan of the dryer and allows it to operate at optimum levels.
Hang it wherever you want: it comes with a strong ring to hang the dryer anywhere, when not in use or to store it without taking up extra space.

IoniCare Power&Go Heaven Black

Foldable 2400 W DC hair dryer with real ionic and pro style technology including precision nozzle, diffuser and cold air function.

FEATURES:

Fast and efficient drying. The IoniCare Power&Go Heaven Black is equipped with a powerful 2400 W motor, ensuring fast and even drying. Save time and achieve professional results with the most advanced drying technology.
Frizz-free, bouncy hair. The real ions in our dryer add shine to your hair and naturally enhance the anti-frizz effect, leaving your hair healthy and beautiful after every use, so you can enjoy frizz-free hair that is full of life.
Easy to move and store. Our hair dryer with ultra compact design and foldable handle for perfect storage and transport. Save space in your suitcase or at home without giving up the power of a normal hair dryer.
Store it and carry it comfortably wherever you want. It includes a velvet carrying bag that allows you to store the product and transport it easily and comfortably.
Smooth and soft hair for longer. The included precision nozzle offers precise styling control, keeping hair straight and smooth for longer, allowing you to direct airflow exactly where needed for perfect results.
Greater volume and defined curls. The diffuser is perfect for achieving natural maximum volume at the roots and defined curls with a professional finish, ideal for those looking for volume and definition in their styling routine.
Fix your hairstyle and prevent hair damage when sealing. The cold air function provides a real flow of cold air, helping to fix the hairstyle and preventing damage to the hair by sealing the cuticle quickly.
Keep your hair dryer in perfect condition with ease. The removable back grille makes it easy to clean the filter, extending the life of the hair dryer and ensuring more efficient and optimal operation with every use.

AC hairdryers

Explore the range

AC MOTOR

Power, speed and unique finishes

Much more than a hairdryer

Configure the hairdryer to suit your needs. Choose between its 2 speeds and 3 temperature settings and enjoy a totally personalised drying experience.

Great air flow

Dry the thickest hair in the most effective way. Our AC hairdryers with a massive 2600 W of power will get rid of the humidity in your hair without wasting your time.

IONREAL

Frizz-free hairstyles

Our IonReal technology projects negative ions onto the hair during drying. In this way, it counteracts the positive ions naturally present in the hair, eliminating frizz and leaving your mane radiant and manageable.

Detachable filter

Remove the filter of your hairdryer in the easiest way and keep your device always clean to optimise its performance with every use.

IoniCare 5300 Maxi Aura

AC ionic hair dryer, 2200 W, and great flow rate.

FEATURES:

Dries hair evenly and quickly. Powerful new-generation AC motor with 2200 W of power. Real ions act on hair leaving it shinier and more moisturised. They also enhance natural hair's anti-frizz features. Real Ion.

The hair gets dry in less time, without damaging the natural colour and shine of the hair, allowing to shape it without drying it out. Great air flow.

Takes total care of your hair by sealing cuticles, resulting in ultra-shiny finish. Pro Style.

Precise drying and total volume control, leaving hair smooth and soft for longer. It incorporates a precision nozzle.

Adds volume at the roots and more defined, flexible and natural curls in a simple way with a professional and long-lasting finish. Maxi-volume diffuser.

The extreme heat protection system ensures that the hair is protected so that it does not lose its natural shine and remains flexible. Hair Care technology.

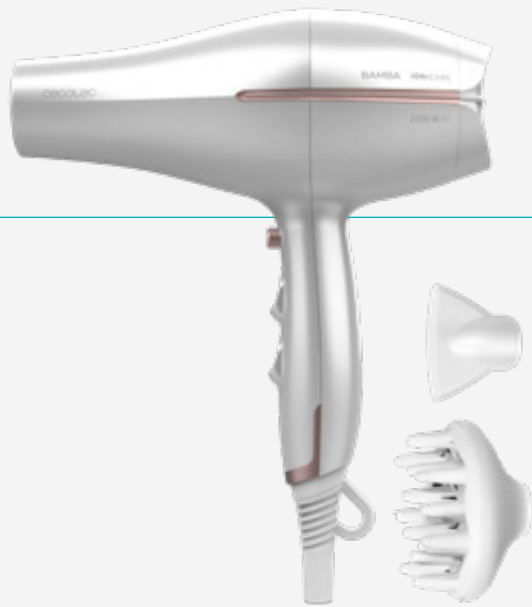

The cool air flow helps prevent hair damage by sealing cuticles rapidly. Cool air function.

Total control. Choose the ideal setting for your hair and hairstyle. 3 temperature and 2 speed settings.

Use the dryer comfortably with complete freedom of movement. Includes a 1.7 m cable.

Diffuser hairdryers with BLDC motor

Explore the range

DRYWAVE NEBULA

Diffuser with BLDC motor: defined curls, with volume and frizz-free

XXL hair diffuser

It covers a larger surface and distributes heat evenly, optimising drying in less time and with more consistent results. This technology allows you to process more hair in each pass, reducing exposure to excessive heat and caring for the health of your hair.

Plasma technology

It distributes heat evenly for fast, frizz-free drying. The action of positive and negative ions helps maintain moisture, reduces static electricity and leaves curls more defined, soft and shiny.

Fast drying

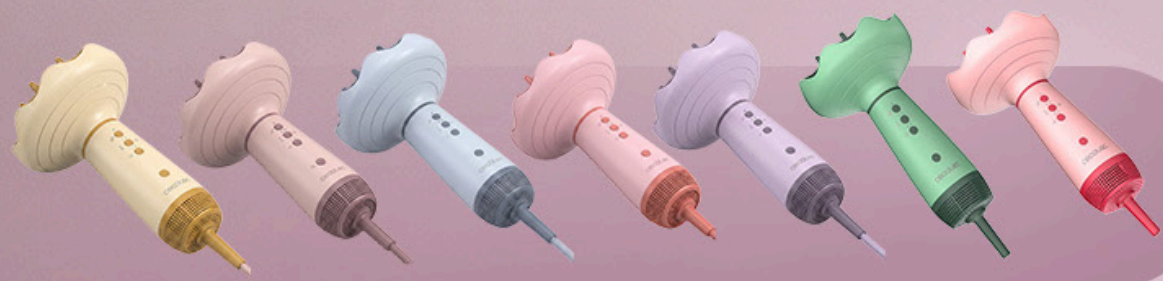

It maintains a constant speed for even drying, without overheating the hair. It is ideal for those seeking perfect results at home.

Soft mode

Designed for curly hair. It is perfect for setting the shape of curls at the end of the drying process, ensuring a longer-lasting and well-groomed style.

DRYWAVE NEBULA

Choose your preferred finish

DryWave Nebula

DryWave Nebula – XXL Diffuser for defined curls with argan oil and keratin, anti-frizz PlasmaTech, quiet and powerful BLDC motor, soft mode, 3 speeds and temperatures, 12 prongs and ergonomic handle

FEATURES:

The large attachment covers more hair with each stroke, distributing heat evenly. It is perfect for curly or wavy hair, as it dries without deforming curls, enhancing their natural volume and definition. Speeds up drying while preserving curl structure. XXL diffuser for curly hair. The Brushless motor reduces internal friction, resulting in less noise, greater durability and energy efficiency. Additionally, it maintains constant speed for uniform drying without overheating hair. Perfect for those seeking professional results at home. BLDC (Brushless) motor.

This innovative function emits negative and positive ions through plasma that neutralise static electricity in your hair. This function eliminates frizz, seals the cuticle and achieves more defined, shiny and controlled curls, even on humid days. PlasmaTech.

Its plate treated with argan oil and keratin cares for your hair from root to tip. Argan oil deeply hydrates and adds shine, while keratin strengthens the hair fibre. The result: softer, nourished curls without frizz. Argan&KeratinOil.

Gently distributes hot air through curls without disrupting them. Designed to enhance natural curl elasticity, providing more controlled shape, volume from the roots and a more defined finish. 12 diffuser prongs.

You can adjust airflow power according to your needs: from low speed for greater control and curl setting, to high speed for faster drying. Adaptability for each hair type and styling moment. 3 speeds.

Three settings allow drying your hair at the ideal temperature: lower for fine or damaged hair, medium for normal hair, and high for thick or abundant hair. Reduces heat damage without compromising results. 3 temperatures.

This gentle drying mode is specially designed for curly hair. It is perfect for setting curl shape at the end of drying, ensuring longer-lasting, well-maintained curls. Soft mode.

Its ergonomic design facilitates handling, providing comfortable grip throughout the drying process. Ideal for long sessions without wrist fatigue. Ergonomic handle.

It offers perfect balance between power and protection. Effectively dries without damaging curl structure, achieving quick and natural results even on dense or high-volume hair. 1300 W power.

DryWave Nebula Olive

XL diffuser hairdryer for curly hair, 2 attachments, 1200 W, 3 speeds, 3 temperatures, Soft Mode, Ionic Technology, travel case

FEATURES:

MaxiCurls head. This is an XL diffuser. Save time and protect your hair. Its generous size allows it to capture a larger section of hair in a single pass, distributing heat evenly. This prevents curl breakage, delivers spectacular volume from the roots, and significantly reduces drying time. Also, it helps achieve much more defined curls.

SkyVolume comb. To add volume at the roots or straighten your curls.

The precise power your curls need. 1200 W provide optimal airflow for fast yet gentle drying, maintaining your hair's natural hydration.

Soft mode. This gentle drying mode is specially designed for curly hair. It is perfect for setting curl shape at the end of drying, ensuring longer-lasting, well-maintained curls

Ionic technology. Negative ions seal the hair cuticle during drying, locking moisture inside the hair. The result is shiny, polished hair with soft, frizz-free curls, regardless of external humidity.

3 speeds and 3 temperatures. You can adjust the airflow and heat to your hair's porosity and thickness, always ensuring maximum care and the best styling results.

Case included.

Removable filter and 360° swivel cord.

FEATURES:

Save time and protect your hair. Its generous size allows it to capture a larger section of hair in a single pass, distributing heat evenly. This prevents curl breakage, delivers spectacular volume from the roots, and significantly reduces drying time. Also, it helps achieve much more defined curls. MaxiCurls XL attachment.
Adds volume at the roots or straightens curls. SkyVolume comb.
The precise power your curls need. Provides optimal airflow for fast yet gentle drying, maintaining your hair's natural hydration. 1200 W.
This gentle drying mode is specially designed for curly hair. It is perfect for setting curl shape at the end of drying, ensuring longer-lasting, well-maintained curls. Soft mode.
Negative ions seal the hair cuticle during drying, locking moisture inside the hair. The result is shiny, polished hair with soft, frizz-free curls, regardless of external humidity. Ionic technology. You can adjust the airflow and heat to your hair's porosity and thickness, always ensuring maximum care and the best styling results. 3 speeds and 3 temperatures.
Take it wherever you want. Carry case included.
Easy cleaning and more comfortable use. Removable filter and 360° swivel cord.

COMPOSITION:

Product, Diffuser, Volumising head, Travel bag, Instruction manual

DryWave Nébula Peach

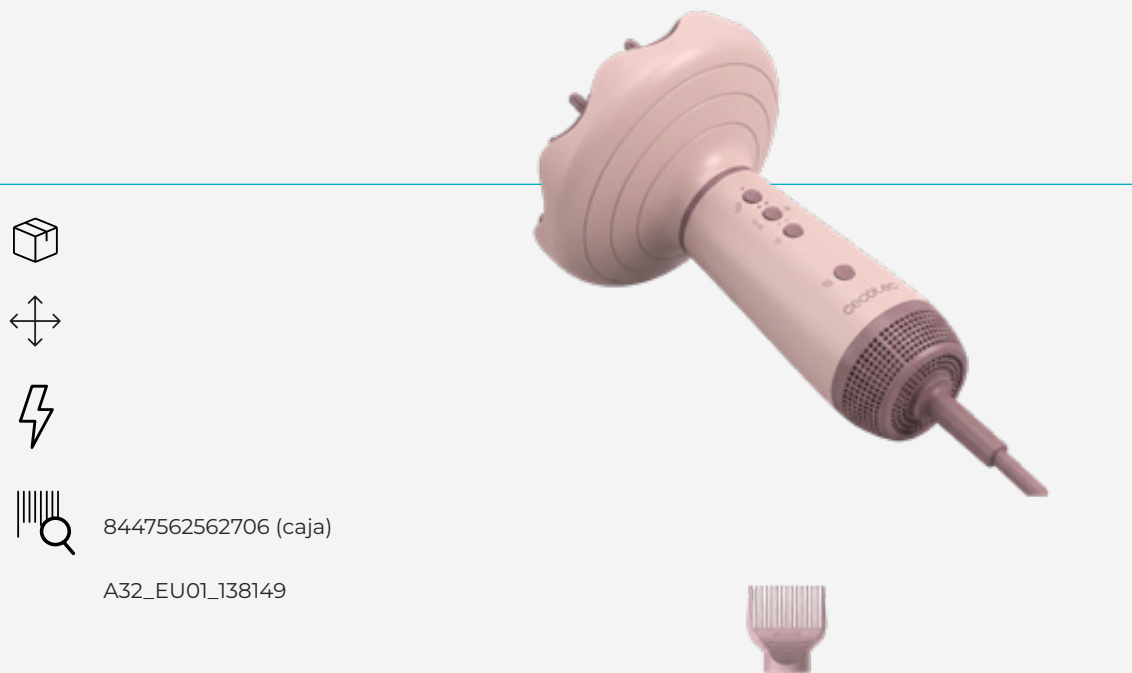

XL diffuser hairdryer for curly hair, 2 attachments, 1200 W, 3 speeds, 3 temperatures, Soft Mode, Ionic Technology, travel case
