Discover the new AirLisse™ 6in1 iTwerk Platinum

**From wet to straight
in one technologically
perfect pass**

Infrared technology

**Less heat damage in
each pass**

Heat penetrates evenly from within the hair, avoiding excessive temperatures. The result: less dryness, fewer split ends, and enhanced hair fibre protection.

**Enhanced shine and
softness**

Helps seal the cuticle, locking in hair's natural moisture. Enjoy a silkier, shinier finish with natural bounce and a healthy look.

Smart plates

Dual heating plate

Ensures a more uniform and consistent temperature in each pass, enhancing straightening effectiveness from the first use. Achieve a shinier, straighter hair with fewer passes.

iTwerk Technology

Its vibrating plates distribute heat evenly, improving contact and optimising every pass. Delivers a faster, more precise result with less heat exposure. Enjoy a natural, pull-free, mark-free, and long-lasting result.

Intelligent innovation for perfect styling

3 operating modes

Fully customise your styling experience to suit every hair type and need: Lisse Mode, Dry Mode and Dry&Lisse Mode.

Brushless motor

With 112 000 rpm, the air straightener dries hair quickly, efficiently, and evenly. Protects the hair fibre, leaving hair soft, shiny, and ready for precise, long-lasting styling.

Airflow

The 19.7 l/s airflow distributes heat uniformly across each strand, preventing damaging hot spots and reducing breakage and split ends.

Plasma technology

Releases negative and positive ions to combat frizz, and boost shine and softness for a lasting, healthy finish.

6 ATTACHMENTS

Concentrator

Transform the straightener into a powerful dryer, controlling its airflow for efficient drying, eliminating moisture and reducing styling time.

Detangling

Gently brush damp hair, detangle without pulling or damage, and prepare it for styling.

6 ATTACHMENTS

Diffuser

Care for and define your curly hair as you dry it. It is recommended to use the lowest speed to keep hair healthy and vibrant.

Root volumising comb

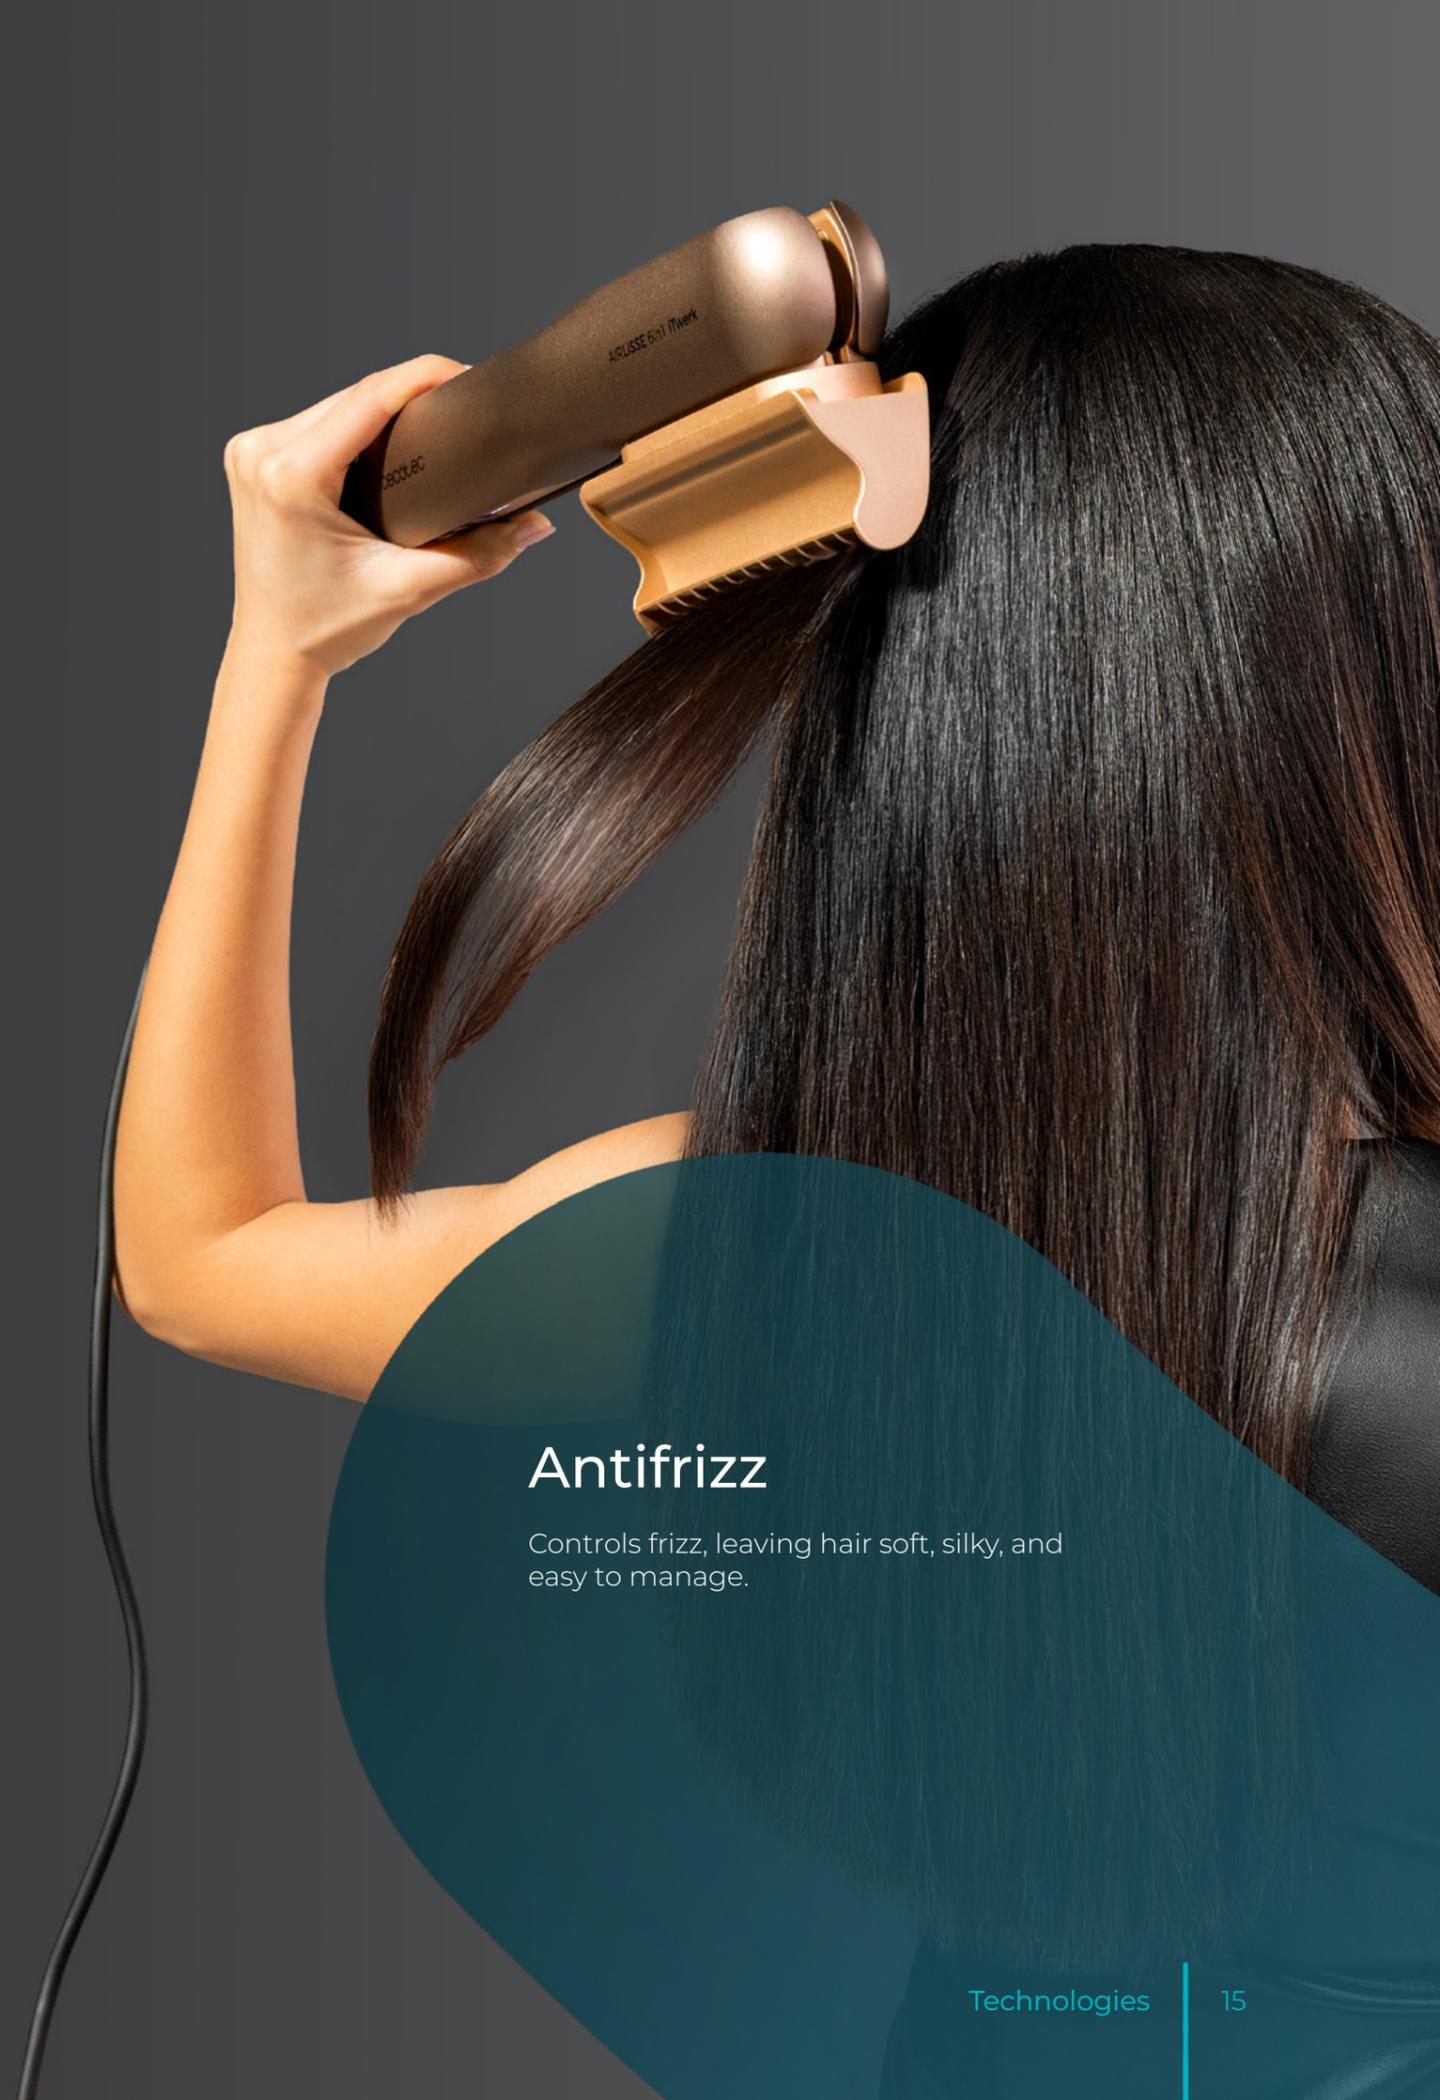

Add volume from the root, achieving a look full of body, movement, and vitality.

6 ATTACHMENTS

Styler

Define hair and ends with total precision and create voluminous waves.

Antifrizz

Controls frizz, leaving hair soft, silky, and easy to manage.

TRANSFORM THE WAY YOU STYLE YOUR HAIR

Premium case

Protects your accessories, keeps the heads secure, and ensures everything stays in place when opened.

Built-in display.

Easily select and control the usage modes for a style tailored to your needs.

Plate detection sensor

Ensures even heat distribution and prevents overheating for safe and efficient styling.

Cares for and protects your hair

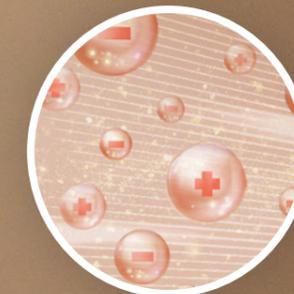

Because your hair deserves it. Its advanced technology is designed to nourish and protect each hair strand from root to tip. Enjoy professional care that brings out the authentic beauty of your hair day after day.

Air technology

Reduces heat damage, protecting your hair so it stays strong, healthy and radiant.

Plasma function

Emits negative and positive ions that neutralise frizz, enhance shine and softness, and seal in the hair's natural moisture for a long-lasting, healthy finish.

Infrared technology

Heats the hair from the inside, reducing exposure time to heat and minimising damage. This gives you longer-lasting, shiny straightening and healthy, silky hair.

Air technology

Reduces heat damage, protecting your hair so it stays strong, healthy and radiant.

Heating plates detection sensor

Ensures even heat distribution and prevents overheating for safe and efficient styling.

Cool air

Fixes the hairstyle and adds a touch of extra shine to the hair.

Dual heating plates²

Distributes heat evenly to better seal the hair fibre in every pass. Achieving a smoother, shinier, and longer-lasting straight style that keeps your hair looking flawless all day.

AirLisse™ 2in1 ForceDry Duo

AirLisse™ 2in1 ForceDry Duo | Air straightener | Dual heating plate | 3 modes | 13 m/s airflow | 112,000 rpm | Brushless motor | 2 attachments

FEATURES:

The AirLisse™ ForceDry Duo ensures longer-lasting and sealed straightening. Enjoy straight and shiny hair that remains perfect throughout the day. Dual heating plate. Combines the power of a hair dryer with the precision of a hair straightener. Personalise styling using the dryer, straightener, or combination of both, easily and versatily. Go from wet to dry hair in just one pass and with greater speed. 3 operating modes to adapt to your needs. Use the dryer-only function to activate the air and dry your hair quickly. Ideal for efficient drying without compromising your hair's health. Dry Mode. The straightening function allows you to use the AirLisse™ ForceDry Duo as a normal hair straightener, offering precise and long-lasting straightening thanks to its dual heating plate. Lisse Mode. Combine airflow with the dual heating plate to dry and straighten your hair simultaneously, saving time and effort while achieving a perfect style. Dry&Lisse Mode. Delivers powerful and efficient performance, ensuring fast and effective styling. 13 m/s and 112,000 rpm airflow. Completely eliminates frizz and increases shine, providing a smooth, silky finish that protects your hair's health. Plasma function. Includes a concentrator for precise drying and a detangling brush for easy styling, providing everything needed for perfect style. 2 attachments. Customise the settings according to your hair type, ensuring safe and effective styling. 4 temperature settings and 2 speeds. Suitable for all hair types.

AirLisse™ 6in1 iTwerk Champagne

AirLisse™ 6in1 iTwerk Champagne: Air straightener with Infrared technology, vibrating plates, 3 operating modes, Plasma, 6 attachments

FEATURES:

Infrared technology. Enjoy faster and more uniform styling with our infrared technology, which penetrates hair from within, reducing heat damage and leaving your hair soft and shiny.

Vibrating plates. The vibrating plates are designed to provide efficient straightening in a single pass. The vibration helps distribute each hair strand evenly along the plate, ensuring complete and uniform contact. This not only improves the straightening result but also reduces styling time by minimising the need for multiple passes.

Dual heating plate. Longer-lasting straightening. Provides even heat on both surfaces, allowing for more efficient and faster hair straightening. This ensures that heat is distributed evenly, reducing styling time and minimising heat damage for a smooth, long-lasting finish. Combines the power of a hair dryer with the precision of a straightener. 3 operating modes: Dry Mode, Lisse Mode, Dry&Lisse Mode.

Achieve perfect, frizz-free results with maximum shine thanks to its heating plate. Lisse Mode. Dries quickly and efficiently, reducing styling time with its powerful airflow. Dry Mode.

Combines heating plates with air function for quick drying and perfect straightening thanks to its powerful airflow and dual heating plate. Dry&Lisse Mode.

Emits negative and positive ions that neutralise frizz, enhance shine and softness, and seal in the hair's natural moisture for a long-lasting, healthy finish. Plasma function.

Converts the air straightener into a dryer and directs airflow for precise and quick drying. Ideal for removing excess moisture and reducing styling time. Concentrator nozzle.

Helps gently detangle wet hair, preparing it for styling without pulling or damage. Detangling brush.

Cares for curly hair while drying it. Recommended for use on the lowest speed for optimal results and healthy hair. Diffuser.

Add volume from the base and create a look full of body, volume and movement. Root volumising comb.

Defines hair and ends with precision, allowing you to create waves and versatile styles. Styling brush.

AirLisse™ Black

AirLisse™ Black Air straightener with hair protection, Ionic Technology, keratin and argan oil, 3 modes and BLDC motor, suitable for all hair types.

FEATURES:

Dry and straighten your hair at the same time. Save time drying and straightening your hair simultaneously and achieve a professional finish in less time.
Simplify your routine and save time. Save time by simplifying the process: make your daily routine easier with an appliance that reduces styling time, allowing you to have more time for yourself.
Maximum versatility in your hands. Use it as a hair dryer, hair straightener or air straightener, adapting it to your hairstyling needs.
Customise each hairstyle. Thanks to its air mode with 3 temperatures and 2 speeds, you can customise your styling experience, as it adapts to your hair's needs.
Precise and efficient styling. Enjoy maximum versatility with the combination of its air and straightener mode, which feature 2 temperatures and 2 speeds for precise and efficient styling.
Smooth and safe hair straightening. Straightener mode that allows you to set the temperature from 130 to 230 °C thanks to its adjustable temperature control, ensuring a smooth and safe straightening and protecting your hair.
Forget about frizz. The ionic function tackles frizz, leaving your hair soft, shiny and manageable.
Intuitive and convenient use. Built-in display for an easy control of functions and settings, ensuring intuitive and convenient operation.
Nourishes and protects your hair. The ceramic and keratin coating protects and nourishes your hair, providing a silky and healthy finish.
Safe and efficient use. The standby sensor ensures safety and energy efficiency by automatically switching off the hair straightener when not in use.
Fix your hairstyle and make it shine. End your blow drying with cool air to set the hairstyle and add a long-lasting shine.
Safe transport and storage. Its plate lock guarantees maximum safety during transport and storage.

RitualCare AirLisse™ 2in1 Black

Air hair straightener with 2 heads: brush and concentrator. It features 106000 rpm with a high-tech digital motor. Dry and straighten your hair with this time-saving straightener.

FEATURES:

Dries and smooths with just one appliance. The Air straightener is a revolutionary appliance that combines the benefits of a hairdryer and a hair straightener. Now you can dry and straighten your wet hair at the same time, thanks to its air power and heating plates.

Two magnetic heads included. This versatile appliance features two magnetised heads: a brush head to gently straighten your hair while drying, and a concentrator head to remove moisture from your hair.

Fast and efficient drying. Motor with 106000 rpm power with 27.78 L/s, which improves drying efficiency by accelerating moisture evaporation.

Eliminates frizz. The hair straightener is equipped with a Plasma function that emits 3 million negative and positive ions. This reduces frizz, increases shine, protects against damage, eliminates static and improves straightening efficiency, giving you healthy, radiant hair.

Plate-closing detection sensor. When you close the plates, the air power is automatically increased, providing more efficient drying and straightening. This smart sensor ensures fast and effective results.

Save time in your routine. Simplify your hair care routine with this air straightener that dries and straightens in one easy step. Forget about using multiple appliances and save time every day.

High pressure air slot. The appliance has a very narrow slot through which the air escapes at a higher pressure. This allows for faster and more precise drying, ensuring that your hair dries evenly and efficiently.

Standby sensor. For added safety and convenience, the appliance has a sensor that detects when you have left it idle on a surface and switches the device off completely. This way, you can use it conveniently without constant background noise.

Customise the straightening. Adjust the temperature of the heating plates with 3 temperatures up to 150 °C. Find the perfect temperature match for your hair type and desired style.

Seals the hairstyle. Extend the life of your hairstyle with the cold air button, which helps to seal it and provides a long-lasting, professional finish. This feature ensures that your style stays intact all day long.

Two magnetic heads included. This versatile appliance features two magnetised heads: a brush head to gently straighten your hair while drying, and a concentrator head to remove moisture from your hair.

Fast and efficient drying. Motor with 106000 rpm power with 27.78 L/s, which improves drying efficiency by accelerating moisture evaporation.

Eliminates frizz. The hair straightener is equipped with a Plasma function that emits 3 million negative and positive ions. This reduces frizz, increases shine, protects against damage, eliminates static and improves straightening efficiency, giving you healthy, radiant hair.

Plate-closing detection sensor. When you close the plates, the air power is automatically increased, providing more efficient drying and straightening. This smart sensor ensures fast and effective results.

Save time in your routine. Simplify your hair care routine with this air straightener that dries and straightens in one easy step. Forget about using multiple appliances and save time every day.

High pressure air slot. The appliance has a very narrow slot through which the air escapes at a higher pressure. This allows for faster and more precise drying, ensuring that your hair dries evenly and efficiently.

Standby sensor. For added safety and convenience, the appliance has a sensor that detects when you have left it idle on a surface and switches the device off completely. This way, you can use it conveniently without constant background noise.

COMPOSITION:

Product, brush head, concentrator head, instruction manual

 42 x 12 x 10.7 cm 1.38 kg
49 x 43.5 x 24.8 cm 12.26 kg

 5 x 4.5 x 34 cm 0.6 kg

 220–240 ~ V 50/60 Hz
1000 W

AirLisse™ 2in1 ForceDry Black

AirLisse™ 2in1 Black Pro air straightener, powerful 19.7 m/s airflow, magnetic attachments, suitable for all hair types, plasma function, Brushless motor, 4 temperatures settings and 2 air speeds.

FEATURES:

Provides fast and efficient drying, reducing styling time. The airflow helps seal the hair cuticle, providing a smooth and shiny finish. Powerful 19.7 l/s airflow.

Achieve faster and more effective straightening, reducing heat exposure time and minimising hair damage. Suitable for all hair types, even the thickest and curliest.

Customise your styling experience and achieve hundreds of looks. 4 temperatures settings and 2 air speeds.

Versatility is at your fingertips with the brush for gently straightening your hair and the concentrator for a more precise finish. Easily switch between them to achieve your desired style. Brush and concentrator nozzle included.

Plasma technology neutralises static electricity, eliminates frizz and leaves your hair silky and manageable. Ideal for a professional finish at home. Plasma function.

Equipped with a high-efficiency Brushless motor, it delivers durable and quiet performance, ensuring uninterrupted styling. 112,000 rpm Brushless motor.

Achieve natural straightening while maintaining hair moisture and shine. Ideal for a healthy and radiant look. Combination of air and heating plates.

Thanks to its air technology, this straightener minimises heat damage, protecting hair and keeping it strong and healthy. Less hair damage.

The smart sensor detects plate contact with your hair, ensuring even heat distribution and preventing overheating. Heating plates detection sensor.

Improved safety with the standby sensor, which automatically switches off the straightener after a period of inactivity, saving energy and preventing accidents. Standby sensor.

It seals your hair with a blast of cool air, which sets the hairstyle and adds extra shine, ensuring your look lasts longer. Cool air.

The ceramic coating with keratin provides smooth gliding and protects hair, leaving it soft and shiny with each stroke. Ceramic coating with keratin.
