# High-precision navigation

## APP CONTROL

### Greater control over mowing

Customise the cut to suit the needs of each area, define restricted zones and take care different lawn areas, even if they are separate. Also, you can check the map of the areas it has mown in the app.

## CAMERA AND LASER

### Knows your garden, recognises its content.

The combination of both technologies<sup>1</sup> enables it to create an accurate map of the garden and recognise animals and objects while mowing.

# Intelligent robot, precise navigation

No cord. No installation. No  
maintenance.

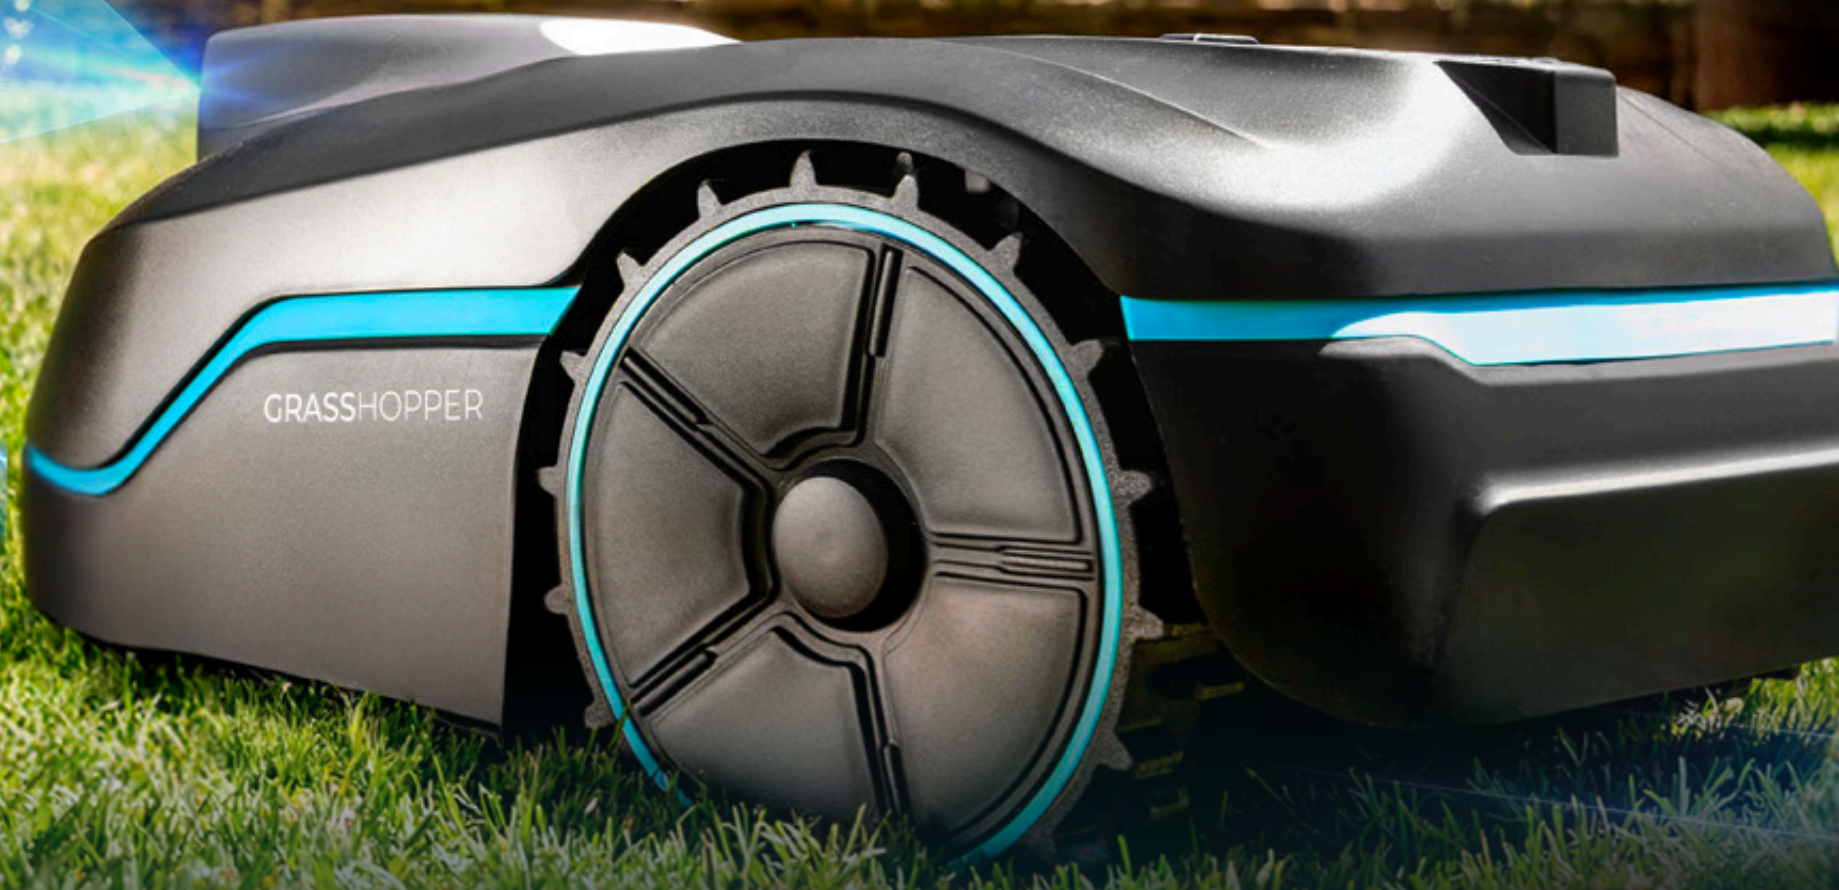

Forget about the boundary wire<sup>1</sup>, its lengthy installation and maintenance. Simply connect to Conga™ GrassHopper and you're ready to go: the robot creates a precise map of your garden so you can choose your mowing settings to suit your preferences.

## AI VISION

### Detects zones and avoids objects

Switch on the robot and forget about worries. AI<sup>2</sup> enables the robot to differentiate between grass and non-grass areas. It also detects pets, wild flowers or objects, such as sprinklers, and avoids them to prevent risks.

# Perfect grass without any effort

## BRUSHLESS MOTOR

### Efficient and quiet

The robot has a state-of-the-art motor that guarantees perfect results. What's more, it operates silently, so you can relax in your garden while Conga™ does the work.

CLIMBS SLOPES OF UP TO 45°.

## FLOATING CUTTING SYSTEM

### Adaptive blades

The robot has adaptive blades that adjust the mowing height to the unevenness of the terrain.

## MULCHING SYSTEM

### Nourishes the lawn

The robot mows neatly, leaving small pieces of grass clippings perfectly distributed to feed the soil with nutrients, achieving a lush appearance.

# Takes care of your entire garden

## INDEPENDENT OPERATION

### Covers up to 800 m<sup>2</sup>

The robot covers large areas so that no part of the garden is left untouched. Create the area from your mobile phone or delimit the work zone with the perimeter cable and enjoy a range of up to 800 m<sup>2</sup>.

## TOTAL SURFACE

### Always completes the mowing

Low battery? No problem: the robot features Total Surface technology, which allows it to return to its base, recharge and resume mowing right where it left off.

# Break with tradition, connect with Conga™

## Perfect lawn with one click

Program the robot and select the cutting height from the app<sup>1</sup>. Connect from anywhere and keep your lawn looking perfect with a simple click on your mobile phone.

## Customised cutting

Adjust the cutting height between 20 and 70 mm, with a cutting width of 200 mm<sup>2</sup>, so that your lawn is just the way you like it, effortlessly.

## Incident notification

If the boundary wire is damaged, you will receive a notification in the app<sup>3</sup> with the exact location of the problem.

# Discover Conga™ GrassHopper

# Conga™ GrassHopper 300

Conga™ GrassHopper 300 robot lawn mower. Digital Brushless motor. For surfaces up to 300 m². Maximum slope of 27%. Cutting height adjustment. Rain sensor. Plug&Play technology.

## FEATURES:

Smart robot lawn mower: keep your lawn neat every day automatically and worry-free. The robot mows the lawn within the area you delimit with the boundary wire.

Thanks to its 100 metre boundary wire, the robot covers a maximum surface area of 300 m².

Digital Brushless: state-of-the-art digital motor that allows an excellent lawn finish in an efficient and quiet way, emitting a noise level of only 61 dB.

Floating Cutting System: the blades adapt to the unevenness of the surface. The robot is able to overcome slopes of up to 27%.

Cutting height regulator: choose the cutting height between 20 and 50 mm. The cutting width is 160 mm.

Plug&Play technology: the robot is programmed to take care of your lawn from Monday to Friday, focusing on the edges two days a week. Switch it on and relax.

IPX5 protection, waterproof and UV protection.

Digital display and touch panel: control the robot thanks to its touch button panel and, if you prefer, you can lock the robot with the PIN code of your choice.

Rain sensor: the robot automatically returns to the charging station when it rains.

Large battery: 2000 mAh, 20 V lithium-ion battery.

## COMPOSITION:

Robot lawn mower, 100 m boundary wire, 130 wire pegs, 9 blades, charging station, instruction manual

# Conga™ GrassHopper 500 Connected

Conga™ GrassHopper 500 robot lawn mower. Digital Brushless motor. For surfaces up to 500 m². Maximum slope of 27%. Cutting height adjustment. Rain sensor. APP control.

## FEATURES:

Smart robot lawn mower: keep your lawn neat every day automatically and worry-free. The robot mows the lawn within the area you delimit with the boundary wire.

Thanks to its 130 metre boundary wire, the robot covers a maximum surface area of 500 m².

Digital Brushless: state-of-the-art digital motor that allows an excellent lawn finish in an efficient and quiet way, emitting a noise level of only 61 dB.

Floating Cutting System: the blades adapt to the unevenness of the surface. The robot is able to overcome slopes of up to 27%.

Adjustable cutting height: choose the cutting height between 20 and 50 mm, with a cutting width of 160 mm.

APP control: operate the robot from anywhere with your smartphone thanks to the Conga™ APP.

IPX5 protection, waterproof and UV protection.

Digital display and touch panel: control the robot thanks to its touch button panel and, if you prefer, you can lock the robot with the PIN code of your choice.

Rain sensor: the robot automatically returns to the charging station when it rains.

Large battery: 2000 mAh, 20 V lithium-ion battery.

## COMPOSITION:

Robot lawn mower, 130 m boundary wire, 180 wire pegs, 9 blades, charging station, instruction manual

# Conga™ GrassHopper 800 Connected

Conga™ GrassHopper 800 Connected robot lawn mower. Digital Brushless motor. For surfaces up to 800 m². Maximum slope of 35%. Cutting height adjustment. Rain sensor. APP control.

## FEATURES:

Smart robot lawn mower: keep your lawn neat every day automatically and worry-free. The robot mows the lawn within the area you delimit with the boundary wire. Thanks to its 170 metre boundary wire, the robot covers a maximum surface area of 800 m². Digital Brushless: state-of-the-art digital motor that allows an excellent lawn finish in an efficient and quiet way, emitting a noise level of only 55 dB. Floating Cutting System: the blades adapt to the unevenness of the surface. The robot is able to overcome slopes of up to 35%. Adjustable cutting height: choose the cutting height between 20 and 60 mm, with a cutting width of 180 mm. APP control: operate the robot from anywhere with your smartphone thanks to the Conga™ APP. IPX5 protection, waterproof and UV protection. Digital display and touch panel: control the robot thanks to its touch button panel and, if you prefer, you can lock the robot with the PIN code of your choice. Rain sensor: the robot automatically returns to the charging station when it rains. Large battery: 4000 mAh, 20 V lithium-ion battery.

# Conga™ GrassHopper 500 Map Connected

Conga™ GrassHopper Map Connected robot lawn mower. Digital Brushless motor. Orderly mowing. For surfaces up to 500 m². Maximum slope of 45%. Cutting height adjustment. Rain sensor. APP control.

## FEATURES:

Mows lawns of up to 500 m² automatically. Smart robot lawn mower that takes care of your lawn, covering up to 500 m² automatically. Define the cutting area with the boundary wire, forget about the robot and enjoy a perfect lawn. Complete lawn mowing planning that avoids missed spots. C-ToF technology: maps out your lawn and identifies the fastest and most efficient path to cut the entire surface evenly, avoiding missed spots. Maximum precision with orderly and quick routes. Efficient paths: optimises mowing time, creating more efficient routes than robots with random navigation. Silent robot (58 dB). State-of-the-art digital motor that provides high performance with low noise level. Adapts the blades to surface roughness. Floating Cutting System: adjusts the height of the blades to protect them against surface roughness. In addition, the robot is able to overcome slopes of up to 45%. Mow your lawn with just one click. App control allows you to mow your home's lawn from anywhere—one click and it's done! Perfect, customised cutting. Live boundary wire monitoring. Boundary assistant: enables real-time status monitoring to detect potential issues. Adjustable cutting. Height 30-70 mm and width up to 200 mm. Cleaning is never half done. 2500 mAh battery with Total Surface, which allows the robot to return to its base when it is low on battery to recharge and pick up where it left off. Leave grass clippings to nourish your lawn. Mulching system: mows the lawn without collecting grass clippings and distributes them on the lawn, thus using garden waste as a source of nutrients and fertilisers for your soil. Withstands adverse weather conditions. IPX6 and UV protection. It also has a rain sensor to prevent the robot from mowing the lawn while it is raining.

# Conga™ GrassHopper 800 ProAI

Conga™ GrassHopper 800 ProAI cordless robot lawn mower. Object recognition with camera. Up to 800 m² covered in one week. Adjustable cutting height between 30 and 60 mm. APP control.

## FEATURES:

Recognises the mowing area and avoids objects. GrassHopper Vision: navigation system with integrated camera that enables object and zone recognition to avoid hazards and achieve perfect mowing. Quick set-up with precise mapping. No boundary wire: forget about having to define the mowing area by laying boundary wire. Set up the robot instantly and enjoy precise, personalised cutting thanks to its efficient and accurate mapping. Mows up to 800 m² of lawn. Care for your entire garden with one robot thanks to its great runtime: covers up to 800 m² automatically without stopping.\*

\*Maximum cutting area will be completed in approximately 7 cutting tasks. If the cutting area is smaller, the required number of times will be reduced. Height from 30 to 60 mm and cutting width of up to 200 mm. Adjustable cutting. Choose the cut and schedule the robot. App Control: enables you to mow your lawn from anywhere; one click and it's done! Schedule when you want the robot to start mowing and adjust the cutting height according to the needs of each moment. Withstands adverse weather conditions. IPX5 protection: resistant to water and UV radiation. It also has a rain sensor to prevent the robot from mowing the lawn while it is raining. Leaves grass clippings to nourish your lawn. Mulching system: rather than collecting the grass clippings, it spreads them across the lawn, providing nutrients and fertiliser to the soil.

NOVEDAD 27

# Conga™ GrassHoper LiDAR

Conga™ GrassHoper LiDAR lawnmower robot. Laser and AI navigation. Map creation. 800 m² coverage. App control.

## FEATURES:

High-precision laser navigation for a flawless cut. Creates an interactive map of your garden and enjoy a personalised cut. With advanced technology, its fast and precise route planning ensures total coverage, eliminating errors and adapting to your space to deliver perfect, faster and more effective results. Cuts up to 800 m² of lawn. Take care of your entire garden with a single robot thanks to its great autonomy: it covers up to 800 m² automatically and without stopping. Cutting height from 20 to 60 mm and cutting width of up to 180 mm. Adjustable cut. Artificial Intelligence. Conga™ GrassHopper cuts intelligently and with maximum precision, avoiding animals and even the smallest objects to prevent risks. Personalised mowing routine with the CECOTEC APP. Connect to control the robot from anywhere and view the map in real time. Set the cutting mode, zone, and plan and schedule everything from its app. The robot creates a map of the garden so you can forget about the perimeter wire and its installation. Connect with Conga™ and take care of your garden effortlessly and worry-free.
