State-of-the-art mobility

Explore the new generation of Bongo electric scooters, designed to transform your riding experience. Discover the most advanced mobility solution, with a design tailored to each person and surface, and patented, approved technology. Join the revolution!

Move around the world

Cecotec, with its Bongo range of scooters, is a world leader in electric mobility. Technologies developed in terms of power, connectivity and security... Innovations with European patents such as the S-Driving System, the first automatic power shift on a scooter, or the strict safety standards that are defining state homologation criteria. A long journey with a single goal: to invest in technology as the driving force behind a more comfortable and sustainable world.

BONGO DOBLE Y85 2X2 XXL CONNECTED

From 0 to 25 km/h in 3 seconds

FOUR-WHEEL DRIVE

Limitless sportiness

Feel the speed and enjoy a sporty ride with its dual motor delivering up to 2100 W of power, so nothing can stop you.

10" TYRES

Get off the road

Break the routine and drive on different surfaces. Its 10" off-road wheels guarantee exceptional grip off the asphalt.

DUAL SUSPENSION

Superior comfort

Drive comfortably over various terrains thanks to its double suspension, which minimises vibrations and maximises comfort.

Dominate the city

POWER

Agile riding

Conquer any type of surface and obstacle, both in the city and in the countryside, with a maximum power of 2100 W that allows you to overcome slopes of up to 25% without any problems.

S-DRIVING SYSTEM¹

Automatic power

Ramps? Speed reduction? No problem. With this system patented by Cecotec, the scooter automatically adjusts its power according to the slope and the weight of the user. This will ensure constant maximum power on every journey, no matter where you're headed.

¹ System available for models 1600 and 165.

Enhanced driving

RUNTIME

Reach even further

The long range of Bongo scooters, up to 85 km, means you can find a scooter that suits your needs, whether for short daily or occasional journeys, or for enjoying a long ride or trip in the countryside. The electric scooter's battery has a large capacity of 20.000 mAh, allowing for a maximum range of up to 85 km.

WHEELS

Don't let anything slow you down

Bongo scooters feature wheels ranging from 8.5' to 10', designed to improve manoeuvrability, offering an agile and safe riding experience. In addition, Bongo also offers models with off-road wheels for venturing beyond the city and driving on unpaved roads.

Convenience for your travels

DOUBLE SUSPENSION

Overcomes obstacles

The road is not always perfect, but the dual suspension system reduces shocks and vibrations for a comfortable ride, even when overcoming large obstacles such as high steps.

XL DECK

Wider, more comfortable

Enjoy greater stability and control thanks to its XXL deck, which even allows you to ride with your feet parallel for a more comfortable experience.

We are moved by your safety

BRAKING SYSTEM

Smooth and precise braking

Ensuring maximum travel safety on the move is our constant commitment in designing our scooters, which feature brake discs and regenerative e-ABS to provide a double or triple braking system.

HOMOLOGATION

Adapted to every country regulations

The scooters are designed in accordance with current traffic regulations¹ in each country and have passed the most demanding technical tests carried out by Idiada, the global certification body for the automotive industry. In Spain we joined DGT (General Directorate of Traffic) and took part in elaborating and implementing the new VMP Technical Characteristics Manual.

Everything at a glance

The large LED display allows for at-a-glance view of the speed and the most important riding data.

Virtual assistant

Get recommendations for use and maintenance by its virtual assistant¹ and check each of your trip's data via the connected telemetry of your Cecotec Bongo.

Connect with your journeys

Apart from their modern and elegant design, or the multiple technologies that improve driving, safety, and user experience, Cecotec's Bongo scooters include features offering an all-round urban travelling experience.

Always on the alert

Feel safer in every trip with the Bongo scooter's accident detector¹, an alert feature that notifies an emergency contact upon detecting an anomaly during travel to avoid scares and ensure that everything is under control.

¹. Available for the Connected models.

Bongo V55 2x2 Connected

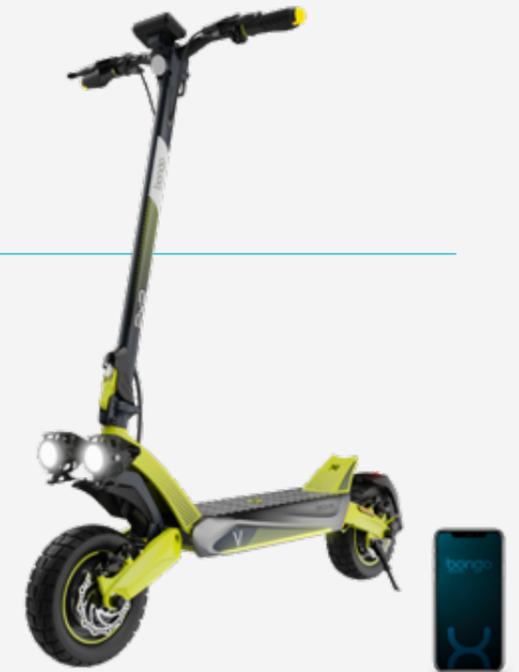

Take your riding experience to the next level with our state-of-the-art electric scooter. With a combined power of 1600 W, dual suspension and an incredible range of up to 55 km, this electric scooter complies with Spanish road regulations and easily connects to your smartphone using our app.

FEATURES:

Overcome any terrain effortlessly. With its two 800 W motors (500 W rated power each), this electric scooter offers a dual drive that allows you to tackle slopes and challenging surfaces with ease, ensuring a powerful and efficient ride in any situation.
Superior range for long trips. Equipped with a high-capacity 48 V 12.5 Ah battery. Enjoy an impressive range of up to 55 km. Ideal for daily commuting and extended adventures, without having to worry about recharging.
Comfortable and stable riding on any surface. The advanced dual suspension ensures a smooth and comfortable riding experience, absorbing road irregularities and providing a stable ride every time.
Maximum grip and control. The 10" wheels guarantee optimum grip and stability, allowing you to face any challenge on the road with safety and confidence.
Safe and efficient braking. The dual braking system with high-precision discs and regenerative e-ABS provides fast and safe stopping, ensuring your safety in any braking situation.
Dynamic riding experience. The dual-motor drive offers a sportier, more controlled riding, giving you quick and precise response to every move.
Improved visibility and safety. Equipped with indicators and a powerful dual headlight, this electric scooter ensures that you are clearly seen by others, even in low light conditions, improving your safety when riding at night.
Approved by the DGT (Spanish Directorate-General for Traffic). It meets all the requirements of the new Spanish road traffic regulations, ensuring that the electric scooter is always in compliance with the law and ready to use.
Smart connectivity with your smartphone. Set and customise your electric scooter easily from your smartphone with the app. Includes advanced features such as fall detection and diagnostics, with 2 years free use of the app.
